CONTENTS

Preface and Acknowledgments	xv
About the Authors	xvii
Introduction	xix

1 GRAMMAR	
	1
Finding Nouns, Verbs, and Subjects	1
Definitions	
Noun	
Verb	
Subject	
Using verbs to find subjects	
Multiple subjects and verbs in a sentence	
Infinitives	
You as an understood subject	
Subject-Verb Agreement	3
Singular vs. plural verbs	
Finding subjects before phrases beginning with <i>of</i>	
With <i>or</i> , <i>either/or</i> , and <i>neither/nor</i>	
Two singular subjects	
One singular and one plural subject	

- With *and*
- With interrupting expressions
- With such portions as *percent, fraction, part*, etc.
- With *here or there*
- With distances, periods of time, sums of money, etc.
- With collective nouns
- The subjunctive mood

Clauses and Phrases

7

- Definitions
- Clause
- Independent clause
- Dependent clause
- Phrase

Pronouns

7

- Definition: Pronoun
- Subject pronouns
 - As the subject of the sentence
 - Renaming the subject
 - When *who* refers to a personal pronoun
- Object pronouns
- Subject and verb agreement with *who, that, and which*
- Subject and verb agreement with *anyone, someone, each*, etc.
- Following *than* or *as*
- Possessive pronouns
- Its* vs. *it's*; *who's* vs. *whose*
- Reflexives: the *-self* pronouns
- Consistency with singular pronouns
- Pronouns linked with nouns by *and*

Who vs. Whom

12

- He/him* method
- Common *whom* pitfall

Whoever vs. Whomever

13

- Agreement with the verb in the dependent clause
- Dependent clause as the subject of the verb following the clause

Who, That, Which**14**

- Who, that, and which* with people, groups, and things
- That* with essential clauses
- Which* with nonessential clauses
- When *which* can be used with essential clauses

Adjectives and Adverbs**15**

- Definitions
 - Adjective
 - Adverb
- Adjectives modifying nouns and pronouns
- Adverbs modifying verbs, adjectives, and adverbs
- When to add *-ly*
- Sense verbs: *taste, smell, look, feel*, etc.
- Good* vs. *well*
- Well* as an adjective when referring to health
- Comparisons, such as *-er* vs. *-est* and *more* vs. *most*
- This, that, these, and those*

Prepositions**18**

- Definition: preposition
- Ending a sentence with a preposition
 - Avoiding extra prepositions
- Like*
- As, as if, as though, the way*
- Of* vs. *have*
- Different from* vs. *different than*
- In* vs. *into*

Effective Writing**20**

- Concrete vs. vague language
- Active vs. passive voice
- Overuse of *there is, there are, it is, it was*, etc.
- Double negatives
- Parallel construction
- Dangling modifiers
- Misplaced modifiers
- Fragments

2 PUNCTUATION**25****Periods****25**

- With complete sentences
- With abbreviations at the end of a sentence
- Replacing periods with question marks and exclamation points

Commas**25**

- To separate three or more items
- To separate adjectives
- With two independent clauses
 - Run-on sentences or comma splices
 - Joined by connectors such as *and*, *or*, *but*, etc.
 - When the subject does not appear in front of the second verb
- With introductory words
- To set off interrupting expressions
- With names
- With dates
- With city and state
- With *Jr.* and *Sr.*
- With degrees and titles
- Starting a sentence with a dependent clause vs. an independent clause
- With nonessential words, clauses, and phrases
- With sufficiently identified noun
- With quotations
 - To introduce or interrupt quotations
 - Following quotations
- To separate statements from questions
- To separate contrasting parts of a sentence
- With certain introductory words
 - When followed by a series of items
 - When the series of items ends with *etc.*

Semicolons**30**

- To replace a period in two closely linked sentences
- With such words as *namely*, *however*, *therefore*, etc., when they introduce a complete sentence
- To avoid confusion where commas already exist
- With sentences that have multiple clauses

Colons	31
To introduce a series of items	
Except when a series of items directly follows a verb or preposition	
With lists	
With two independent clauses when the second explains the first	
With long quotations	
After the salutation in a business letter	
Quotation Marks	33
Use of double quotation marks	
With titles of magazines, books, plays, etc.	
With periods and commas	
ALWAYS inside quotation marks	
Use of single quotation marks for quotations within quotations	
Spacing between single and double quotation marks	
With nonstandard expressions	
With technical terms and terms used in an unusual way	
Avoiding single quotation marks	
With quoted material of more than one paragraph	
Parentheses and Brackets	34
Not interchangeable	
Parentheses	34
For clarification and asides	
With complete sentences	
Subject-verb agreement	
Comma placement with parentheses	
Brackets	35
With interruptions	
Use of [sic]	
With quotations	
Apostrophes	36
Singular nouns	
Possession with singular nouns	
Possession with common nouns ending in s	
Possession with proper nouns ending in s	
Plural nouns	
Plural possession with regular nouns	
No apostrophe with regular nouns	

Plural possession with irregular nouns	
Plural possession with names ending in s	
No apostrophe with plural names	
Possession with singular compound nouns	
To show joint possession	
Contractions	
With initials, capital letters, and numbers used as nouns	
With time or money	
With personal pronouns	
Apostrophes vs. single quotation marks	
False possessives	
With nouns ending in y	
Hyphens	40
Hyphens between words	41
With compound adjectives	
With compound verbs	
With compound nouns	
With <i>very</i> and <i>-ly</i> adverbs	
With ages	
For clarification	
With spans of time, distance, or other quantities	
With compound numbers	
With spelled-out fractions	
With double last names	
Avoiding overuse	
Look it up	
Hyphens with prefixes and suffixes	43
Prefixes with proper nouns or proper adjectives	
Prefixes with double vowels	
With <i>self-</i> , <i>ex-</i> , and <i>all-</i>	
With <i>re-</i>	
To avoid confusion	
Suffixes not usually hyphenated	
Suffixes and double letters	
Using discretion and a dictionary	
Dashes	45
Dashes and subject agreement	
In place of other punctuation	
Spacing	

Ellipses 46

Definition and three-dot method
With omitted words or sentences
To express hesitation, changes of mood, etc.

Question Marks 47

With direct questions
Replacing periods
Capitalization following a question mark
Indirect questions
Rhetorical questions
With sentences that are half statement and half question
With quotation marks

Exclamation Points 48

To show emotion, emphasis, or surprise
Replacing periods
Avoidance in formal business writing
Justifiable use

3 CAPITALIZATION

49

First word of a document and after a period

Proper nouns and adjectives derived from proper nouns

Reference list of capitalized categories

Reference list of lowercase categories

Thorny aspects of capitalization

Titles

Titles vs. occupations

Titles in direct address

Kinship names

Nicknames

Geographic regions vs. points of the compass

The before proper nouns

City, town, county, etc., before a proper name

First word of a quotation

Midsentence independent clauses or questions

Course titles vs. academic subjects

Art movements

Lists following colons

Lowercase *the national anthem*
Titles of books, plays, films, songs, etc.
Subtitles

4 WRITING NUMBERS

57

Using figures vs. spelling out numbers
Numbers beginning a sentence
Hyphenating compound numbers
 Hyphenating fractions
Figures of four or more digits
 Sums less than a dollar
Noon and midnight
 Time of day
Mixed fractions
Large numbers
Decimals
When to use *and*
Dates
Decades
 Use lowercase when spelling out
 Using apostrophes with incomplete numerals
 Avoiding apostrophe + s with complete numerals

5 CONFUSING WORDS AND HOMONYMS

61

Imply vs. infer
Lay vs. lie
Their vs. there vs. they're
Hundreds more words and homonyms that perplex and confound

PREFACE AND ACKNOWLEDGMENTS

Jane Straus created her English language instructional materials because she “found no books that conveyed the rules of English in—well—plain English.” Over the years of teaching basic English language skills to state and federal government employees as well as to individuals in the private sector and in nonprofit organizations, she refined her materials, eventually creating *The Blue Book of Grammar and Punctuation* and its related website, GrammarBook.com.

In the introduction to the tenth edition, the author spoke of her 2003 brain tumor diagnosis, how it led to her next bold steps in life, and her successful surgery to remove the tumor. Unfortunately, in 2009, she again learned she had a new, unrelated brain tumor—this time malignant. Jane Ruth Straus passed away on February 25, 2011.

Due to the outpouring of appreciation for her work, her husband, Lester Kaufman, continued to oversee the GrammarBook.com website so that anyone around the world could still benefit from her life’s work. He also collected ideas and suggestions for changes, new material, and improvements to *The Blue Book*. After making the acquaintance of Tom Stern, a Marin County, California, writer and editor, Kaufman recognized that Stern possessed the knowledge, skills, experience, and passion needed to thoroughly re-examine *The Blue Book* and revise it to make it a first-rate grammar resource for everyone.

First and foremost, thanks must go to the late Jane Straus for her vision and persistence in creating a reference guide and workbook that is popular and easy to understand. We could not have succeeded in updating this book without the assistance of Marjorie McAneny at Jossey-Bass and literary agent Cathy Fowler, both of whom steadfastly believed in the book’s value. We also thank Zoe Kaufman, Jojo Ortiz, and Patti Clements, for their contributions to the quizzes; the thousands of loyal readers and viewers of the GrammarBook.com website who, by offering valuable input daily, have helped shape the rules, examples, and quizzes; and Gary Klehr, for helping name the book many years ago.

This book is dedicated to my brilliant wife, Jane Straus. She was a multitalented woman with boundless energy and a natural gift for clarifying all matters complex. She put her heart and soul into everything she undertook. She was taken from us far too soon.

—LESTER KAUFMAN

ABOUT THE AUTHORS

JANE STRAUS (1954–2011) was an educator, life coach, and best-selling author. To prepare for a job teaching English to employees of the state of California in 1975, Straus scoured the library for materials that conveyed the rules of English in plain English. Finding no such resources, she wrote the rules her own way, made up exercises, ran off some copies, and hoped for the best.

The class was a hit. More and more state employees demanded that they get an equal opportunity to benefit from Straus's no-nonsense instruction in English grammar and usage. She continued to refine her materials, eventually turning them into *The Blue Book of Grammar and Punctuation*.

When the Internet was born, she launched a website, GrammarBook.com, which has helped millions of people all over the world improve their English grammar. Straus became a sought-after speaker in the fields of grammar, public speaking, and life coaching. Her other book is *Enough Is Enough! Stop Enduring and Start Living Your Extraordinary Life* (Jossey-Bass, 2005).

LESTER KAUFMAN is the publisher of GrammarBook.com. A lifelong public servant, he served first in the Peace Corps, and eventually completed the final years of his federal career with the U.S. Environmental Protection Agency. He married Jane Straus in 1987.

After his retirement from the EPA, Kaufman began assisting with the operation of Straus's fledgling website and helped edit previous editions of *The Blue Book of Grammar and Punctuation*.

Following Jane Straus's untimely passing in early 2011, Kaufman assumed management of GrammarBook.com, which features an informative and entertaining weekly newsletter that encourages readers to ask grammar questions and offer their views on the state of twenty-first-century English.

TOM STERN is a freelance writer and editor. After leaving a career in the music business in 1992, he became a copyeditor-reporter-critic, eventually working for a number of San Francisco Bay Area periodicals. In 2011, his twice-monthly grammar column for a Marin County newspaper chain placed first in the California Newspaper Publishers Association's Better Newspapers Contest.

INTRODUCTION

Now in its eleventh edition, *The Blue Book of Grammar and Punctuation* will help you write and speak with confidence. You don't have to be an English major to understand grammar and punctuation. You just need rules and guidelines that are easy to understand, with real-world examples.

Whether you are an instructor teaching students the rules of English or a student, executive, professional writer, or avid blogger honing your grammar and punctuation skills, this book will help you zip through tests (including the SAT), reports, essays, letters, e-mails, and résumés. It will help you (and your writing) impress your teachers, your clients, and other readers.

Every generation of English scholars despairs because the language always seems to be at a crisis point. But it is undeniable that everywhere one looks nowadays, the principles in this book are casually and cavalierly violated.

The Blue Book will prove to be a valuable tool for teachers and students in achieving the goals of the Common Core State Standards Initiative. Studying the chapters and working through the quizzes will provide students of all ages with the skills and knowledge they need to succeed beyond high school—in college and in the workplace. Students will learn how to use formal English in their writing and speaking and how to better express themselves through language. We also recommend reading the works of great writers to experience firsthand the art and beauty of effective communication.

This book is logical, self-paced, and fun to use, with scores of interesting and challenging quizzes that you may photocopy to your heart's content. Best of all, you can look forward to instant gratification, because the answers to the quizzes are included.

Throughout the text, certain terms have been set in boldface type (for instance, at the beginning of Chapter One, **noun**, **common nouns**, **proper nouns**). Due to space and other

considerations, we could not always explore these linguistic terms as thoroughly as we might have wished. Readers are strongly urged to look further into these terms on their own. We also recommend that those who are serious about improving their English grammar always keep a dictionary close by and use it assiduously.

If you don't have time to research several leading reference books to figure out where the next comma should go or whether to write *who* or *whom*, you will find *The Blue Book* to be a pleasure to use. Dedicated to eliminating unnecessary jargon, it highlights the most important grammar, punctuation, and capitalization rules and guidelines and clarifies some of the language's most confusing and confounding words.

In Chapter One, "Grammar," you will learn how to find nouns, verbs, and subjects and make sure they agree with one another. Next you will learn about clauses and phrases, the keys to understanding sentence structure. Then, on to pronoun usage, so that you will know whether to write *I* or *me*, *he* or *him*, *who* or *whom*, etc. From there, in the "Adjectives and Adverbs" section, you will discover why some words have *-ly* added to them, and why you must say, "She did well on the test," rather than "She did good on the test." After that, you will breeze through prepositions, learning some surprising rules, and we will debunk at least one myth. (*Hint:* Is it safe to ask, "What are you talking about?" or must we ask, "About what are you talking?")

The "Effective Writing" section of Chapter One will give you helpful tips for constructing sentences and paragraphs that flow gracefully, making it easier to write quickly and well.

Chapter Two, "Punctuation," takes on all the usual suspects: periods, commas, semicolons, colons, quotation marks, parentheses and brackets, apostrophes, hyphens, dashes, ellipses, question marks, and exclamation points. The best part about this and other chapters is that you will find an abundance of examples that you run across every day.

Then comes Chapter Three, "Capitalization," in which you will get your most vexing questions answered, learning which words to capitalize in a title and when to capitalize job titles, such as *president* or *director*.

In Chapter Four, "Writing Numbers," you will learn the importance of consistency when using numerals or writing out numbers. You will also learn how to write fractions and large numbers.

After that, you will enjoy spending time reading all about *affect* vs. *effect*, *lay* vs. *lie*, *their* vs. *there* vs. *they're*, and *its* vs. *it's* in Chapter Five, "Confusing Words and Homonyms." We have provided hundreds of words and phrases for you in this chapter, so you will never again have to be confused by the differences between *farther* and *further*, *continual* and *continuous*, *flaunt* and *flout*, *tortuous* and *torturous*, and all the rest of the trickiest and most commonly misused words and phrases in the English language.

Promise not to skip the quizzes, pretests, or mastery tests in Chapter Six. The more you practice, the more confident you will become. Once you get over any fears about test taking,

we think you will find the quizzes both enjoyable and challenging. You will find the answers in Chapter Seven.

Please visit www.GrammarBook.com, where you will find all the quizzes in the book in a multiple-choice, interactive format. If you are a teacher or are really jazzed about improving your English skills, on the website you will also find

- Hundreds of additional downloadable, interactive quizzes in the “Subscription” area
- Dozens of free one-minute videos by Jane Straus on English language usage
- All the rules and examples you see in the book
- A sign-up box on the home page for our free weekly e-newsletter with tips and articles
- Our blog
- Recommendations for further reading and study

The point of grammar proficiency is to be clear and direct, and to avoid misunderstanding. We hope you will come away from this book with this mantra: “Think before you write.” Be sure every sentence conveys what you mean, with no possibility of ambiguity or inadvertent meaninglessness.

That being said, as George Orwell wrote in 1946, “Break any of these rules sooner than say anything outright barbarous.”

We hope you find *The Blue Book* to be both enjoyable and invaluable.

The authors researched the leading reference books on American English grammar and punctuation including *The Chicago Manual of Style*, *The Associated Press Stylebook*, Fowler’s *Modern English Usage*, Bernstein’s *The Careful Writer*, and many others. The authors provide rules, guidance, and examples based on areas of general agreement among the authorities. Where the authorities differ, this book provides options to follow based on the reader’s purpose in writing, with this general advice: be consistent.

CHAPTER 1

GRAMMAR

FINDING NOUNS, VERBS, AND SUBJECTS

NOTE

We will use the standard of underlining subjects once and verbs twice.

Definitions

- A **noun** is a word or set of words for a person, place, thing, or idea. A noun of more than one word (*tennis court, gas station*) is called a **compound noun**.

There are **common nouns** and **proper nouns**. Common nouns are words for a general class of people, places, things, and ideas (*man, city, award, honesty*). They are not capitalized. Proper nouns are always capitalized. They name specific people, places, and things (*Joe, Chicago, Academy Award*).

For more on nouns, see Chapter Two, “Apostrophes,” Rules 2a through 2e.

- A **verb** is a word or set of words that shows action (*runs, is going, has been painting*); feeling (*loves, envies*); or state of being (*am, are, is, have been, was, seem*).

Examples: He ran around the block.

I like my friend.

They seem friendly.

State-of-being verbs are called **linking verbs**. They include all forms of the verb *to be*, plus such words as *look*, *feel*, *appear*, *act*, *go*, followed by an adjective. (See the “Adjectives and Adverbs” section later in this chapter.)

Examples: You look happy.

We feel fine.

He went ballistic.

Verbs often consist of more than one word. For instance, *had been breaking down* is a four-word verb. It has a two-word main verb, *breaking down* (also called a **phrasal verb**), and two **helping verbs** (*had* and *been*). Helping verbs are so named because they help clarify the intended meaning.

Many verbs can function as helping verbs, including *is*, *shall*, *must*, *do*, *has*, *can*, *keep*, *get*, *start*, *help*, etc.

- A **subject** is the noun, pronoun (see the “Pronouns” section later in this chapter), or set of words that performs the verb.

Examples: *The woman hurried.*

Woman is the subject.

She was late.

She is the subject.

Shakespeare in Love won an Academy Award.

Shakespeare in Love is the subject.

Rule 1. To find the subject and verb, always find the verb first. Then ask who or what performed the verb.

Examples: *The jet engine passed inspection.*

Passed is the verb. Who or what passed? The engine, so *engine* is the subject. (If you included the word *jet* as the subject, lightning will not strike you. But technically, *jet* is an adjective here and is part of what is known as the complete subject.)

From the ceiling hung the chandelier.

The verb is *hung*. Now, if you think *ceiling* is the subject, slow down. Ask *who* or *what* hung. The answer is the chandelier, not the ceiling. Therefore, *chandelier* is the subject.

Rule 2. Sentences can have more than one subject and more than one verb.

Examples: I like cake, and he likes ice cream. (Two subjects and two verbs)

He and I like cake. (Two subjects and one verb)

She lifts weights and jogs daily. (One subject and two verbs)

Rule 3. If a verb follows *to*, it is called an **infinitive**, and it is not the main verb. You will find the main verb either before or after the infinitive.

Examples: He is *trying to leave*.

To leave is an infinitive; the main verb is *trying*.

To leave was his wish.

The main verb is *was*.

NOTE

One of the most stubborn superstitions in English is that it is wrong to insert a word between the *to* and the verb in an infinitive. This is called a **split infinitive** (*to gladly pay*, *to not go*). There is no English scholar alive who will say a split infinitive is technically wrong. However, split infinitives tend to be clumsy and unnecessary. Experienced writers do not use them without good reason.

Rule 4. Any request or command, such as *Stop!* or *Walk quickly*, has the understood subject *you*, because if we ask who is to stop or walk quickly, the answer must be “you.”

Example: (You) Please bring me some coffee.

Bring is the verb. Who will do the bringing? The subject *you* is understood.

SUBJECT-VERB AGREEMENT

Being able to find the right subject and verb will help you correct errors of subject-verb agreement.

Basic rule. A singular subject (*she, Bill, car*) takes a singular verb (*is, goes, shines*), whereas a plural subject takes a plural verb.

Example: The list of items is/are on the desk.

If you know that *list* is the subject, then you will choose *is* for the verb.

Rule 1. A subject will come before a phrase beginning with *of*. This is a key rule for understanding subjects. The word *of* is the culprit in many, perhaps most, subject-verb mistakes.

Hasty writers, speakers, readers, and listeners might miss the all-too-common mistake in the following sentence:

Incorrect: *A bouquet of yellow roses lend color and fragrance to the room.*

Correct: *A bouquet of yellow roses lends. . . (bouquet lends, not roses lend)*

Rule 2. Two singular subjects connected by *or*, *either/or*, or *neither/nor* require a singular verb.

Examples: *My aunt or my uncle is arriving by train today.*

Neither Juan nor Carmen is available.

Either Kiana or Casey is helping today with stage decorations.

Rule 3. The verb in an *or*, *either/or*, or *neither/nor* sentence agrees with the noun or pronoun closest to it.

Examples: *Neither the plates nor the serving bowl goes on that shelf.*

Neither the serving bowl nor the plates go on that shelf.

This rule can lead to bumps in the road. For example, if *I* is one of two (or more) subjects, it could lead to this odd sentence:

Awkward: *Neither she, my friends, nor I am going to the festival.*

If possible, it's best to reword such grammatically correct but awkward sentences.

Better: *Neither she, I, nor my friends are going to the festival.*

OR

She, my friends, and I are not going to the festival.

Rule 4. As a general rule, use a plural verb with two or more subjects when they are connected by *and*.

Example: *A car and a bike are my means of transportation.*

But note these exceptions:

Exceptions: *Breaking and entering is against the law.*

The bed and breakfast was charming.

In those sentences, *breaking and entering* and *bed and breakfast* are compound nouns.

Rule 5. Sometimes the subject is separated from the verb by such words as *along with*, *as well as*, *besides*, *not*, etc. These words and phrases are not part of the subject. Ignore them and use a singular verb when the subject is singular.

Examples: The politician, along with the newsmen, is expected shortly.
Excitement, as well as nervousness, is the cause of her shaking.

Rule 6. With words that indicate portions—percent, fraction, majority, some, all, etc.—Rule 1 given earlier is reversed, and we are guided by the noun after of. If the noun after of is singular, use a singular verb. If it is plural, use a plural verb.

Examples: Fifty percent of the pie has disappeared.
Fifty percent of the pies have disappeared.
A third of the city is unemployed.
A third of the people are unemployed.
All of the pie is gone.
All of the pies are gone.
Some of the pie is missing.
Some of the pies are missing.

NOTE

In recent years, the SAT testing service has considered *none* to be strictly singular. However, according to *Merriam-Webster's Dictionary of English Usage*: "Clearly *none* has been both singular and plural since Old English and still is. The notion that it is singular only is a myth of unknown origin that appears to have arisen in the 19th century. If in context it seems like a singular to you, use a singular verb; if it seems like a plural, use a plural verb. Both are acceptable beyond serious criticism." When *none* is clearly intended to mean "not one," it is followed by a singular verb.

Rule 7. In sentences beginning with *here* or *there*, the true subject follows the verb.

Examples: There are four hurdles to jump.
There is a high hurdle to jump.
Here are the keys.

NOTE

The word *there's*, a contraction of *there is*, leads to bad habits in informal sentences like *There's a lot of people here today*, because it's easier to say "there's" than "there are." Take care never to use *there's* with a plural subject.

Rule 8. Use a singular verb with distances, periods of time, sums of money, etc., when considered as a unit.

Examples: *Three miles is too far to walk.*

Five years is the maximum sentence for that offense.

Ten dollars is a high price to pay.

BUT

Ten dollars (i.e., dollar bills) were scattered on the floor.

Rule 9. Some collective nouns, such as *family*, *couple*, *staff*, *audience*, etc., may take either a singular or a plural verb, depending on their use in the sentence.

Examples: *The staff is in a meeting.*

Staff is acting as a unit.

The couple disagree about disciplining their child.

The couple refers to two people who are acting as individuals.

NOTE

Anyone who uses a plural verb with a collective noun must take care to be accurate—and also consistent. It must not be done carelessly. The following is the sort of flawed sentence one sees and hears a lot these days:

The staff is deciding how they want to vote.

Careful speakers and writers would avoid assigning the singular *is* and the plural *they* to *staff* in the same sentence.

Consistent: *The staff are deciding how they want to vote.*

Rewriting such sentences is recommended whenever possible. The preceding sentence would read even better as:

The staff members are deciding how they want to vote.

Rule 10. The word *were* replaces *was* in sentences that express a wish or are contrary to fact:

Example: *If Joe were here, you'd be sorry.*

Shouldn't *Joe* be followed by *was*, not *were*, given that *Joe* is singular? But *Joe* isn't actually here, so we say *were*, not *was*. The sentence demonstrates the **subjunctive mood**, which is used to express things that are hypothetical, wishful, imaginary, or factually contradictory. The subjunctive mood pairs singular subjects with what we usually think of as plural verbs.

Examples: *I wish it were Friday.*

She requested that he raise his hand.

In the first example, a wishful statement, not a fact, is being expressed; therefore, *were*, which we usually think of as a plural verb, is used with the singular subject *I*.

Normally, *he raise* would sound terrible to us. However, in the second example, where a request is being expressed, the subjunctive mood is correct.

Note: The subjunctive mood is losing ground in spoken English but should still be used in formal speech and writing.

CLAUSES AND PHRASES

Definitions

- A **clause** is a group of words containing a subject and verb. An **independent clause** is a simple sentence. It can stand on its own.

Examples: *She is hungry.*

I am feeling well today.

- A **dependent clause** cannot stand on its own. It needs an independent clause to complete a sentence. Dependent clauses often begin with such words as *although*, *since*, *if*, *when*, and *because*.

Examples: *Although she is hungry. . .*

Whoever is hungry. . .

Because I am feeling well. . .

Dependent

Although she is hungry, she will give him some of her food.

Whatever they decide, I will agree to.

Independent

- A **phrase** is a group of words without a subject-verb component, used as a single part of speech.

Examples: *Best friend* (noun phrase)

Needing help (adjective phrase; see the “Adjectives and Adverbs” section later in this chapter)

With the blue shirt (prepositional adjective phrase; see the “Prepositions” section later in this chapter)

For twenty days (prepositional adverb phrase)

PRONOUNS

Definition

- A **pronoun** (*I, me, he, she, herself, you, it, that, they, each, few, many, who, whoever, whose, someone, everybody, etc.*) is a word that takes the place of a noun. In the sentence *Joe saw Jill, and he waved at her*, the pronouns *he* and *her* take the place of *Joe* and

Jill, respectively. There are three types of pronouns: **subject** (for example, *he*); **object** (*him*); or **possessive** (*his*).

Rule 1. Subject pronouns are used when the pronoun is the subject of the sentence. You can remember subject pronouns easily by filling in the blank subject space for a simple sentence.

Example: ____ did the job.

I, he, she, we, they, who, whoever, etc., all qualify and are, therefore, subject pronouns.

Rule 2. Subject pronouns are also used if they rename the subject. They will follow *to be* verbs, such as *is, are, was, were, am, will be, had been*, etc.

Examples: It is *he*.

This is she speaking.

It is we who are responsible for the decision to downsize.

NOTE

In informal English, most people tend to follow *to be* verbs with object pronouns like *me, her, them*. Many English scholars tolerate this distinction between formal and casual English.

Example: *It could have been them.*

Technically correct: *It could have been they.*

Example: *It is just me at the door.*

Technically correct: *It is just I at the door.*

Rule 3. This rule surprises even language watchers: when *who* refers to a personal pronoun (*I, you, he, she, we, they*), it takes the verb that agrees with that pronoun.

Correct: It is *I* who **am** sorry. (*I am*)

Incorrect: It is *I* who **is** sorry.

Correct: It is *you* who **are** mistaken. (*you are*)

Incorrect: It is *you* who's mistaken.

Rule 4. Object pronouns are used everywhere else beyond Rules 1 and 2 (**direct object**, **indirect object**, **object of a preposition**). Object pronouns include *me, him, herself, us, them, themselves*, etc.

Examples: Jean saw **him**.

Him is the direct object.

Give her the book.

Her is the indirect object. The direct object is *book*.

Are you talking to me?

Me is the object of the preposition *to*.

Rule 5. The pronouns *who*, *that*, and *which* become singular or plural depending on the subject. If the subject is singular, use a singular verb. If it is plural, use a plural verb.

Example: *He is the only one of those men who is always on time.*

The word *who* refers to *one*. Therefore, use the singular verb *is*.

Sometimes we must look more closely to find a verb's true subject:

Example: *He is one of those men who are always on time.*

The word *who* refers to *men*. Therefore, use the plural verb *are*.

In sentences like this last example, many would mistakenly insist that *one* is the subject, requiring *is always on time*. But look at it this way: *Of those men who are always on time, he is one*.

Rule 6. Pronouns that are singular (*I, he, she, everyone, everybody, anyone, anybody, no one, nobody, someone, somebody, each, either, neither, etc.*) require singular verbs. This rule is frequently overlooked when using the pronouns *each*, *either*, and *neither*, followed by *of*. Those three pronouns always take singular verbs. Do not be misled by what follows *of*.

Examples: *Each of the girls sings well.*

Either of us is capable of doing the job.

Neither of them is available to speak right now.

Exception: When *each* follows a noun or pronoun in certain sentences, even experienced writers sometimes get tripped up:

Incorrect: *The women each gave her approval.*

Correct: *The women each gave their approval.*

Incorrect: *The words are and there each ends with a silent vowel.*

Correct: *The words are and there each end with a silent vowel.*

These examples do not contradict Rule 6, because *each* is not the subject, but rather an **adjunct** describing the true subject.

Rule 7. To decide whether to use the subject or object pronoun after the words *than* or *as*, mentally complete the sentence.

Examples: *Tranh is as smart as she/her.*

If we mentally complete the sentence, we would say *Tranh is as smart as she is*. Therefore, *she* is the correct answer.

Zoe is taller than I/me.

Mentally completing the sentence, we have *Zoe is taller than I am.*

Daniel would rather talk to her than I/me.

We can interpret this sentence in two ways: *Daniel would rather talk to her than to me.* **OR** *Daniel would rather talk to her than I would.* A sentence's meaning can change considerably, depending on the pronoun you choose.

Rule 8. The possessive pronouns *yours*, *his*, *hers*, *its*, *ours*, *theirs*, and *whose* never need apostrophes. Avoid mistakes like *her's* and *your's*.

Rule 9. The only time *it's* has an apostrophe is when it is a contraction for *it is* or *it has*. The only time *who's* has an apostrophe is when it means *who is* or *who has*. There is no apostrophe in *oneself*. Avoid “one's self,” a common error.

Examples: *It's been a cold morning.*

The thermometer reached its highest reading.

He's the one who's always on time.

He's the one whose wife is always on time.

Keeping oneself ready is important.

Rule 10. Pronouns that end in *-self* or *-selves* are called **reflexive pronouns**. There are nine reflexive pronouns: *myself*, *yourself*, *himself*, *herself*, *itself*, *oneself*, *ourselves*, *yourselves*, and *themselves*.

Reflexive pronouns are used when both the subject and the object of a verb are the same person or thing.

Example: *Joe helped himself.*

If the object of a preposition refers to a previous noun or pronoun, use a reflexive pronoun:

Example: *Joe bought it for himself.*

Reflexive pronouns help avoid confusion and nonsense. Without them, we might be stuck with sentences like *Joe helped Joe*.

Correct: *I worked myself to the bone.*

The object *myself* is the same person as the subject *I*, performing the act of working.

Incorrect: *My brother and myself did it.*

Correct: *My brother and I did it.*

Don't use *myself* unless the pronoun *I* or *me* precedes it in the sentence.

Incorrect: *Please give it to John or myself.*

Correct: *Please give it to John or me.*

Correct: *You saw me being myself.*

Myself refers back to *me* in the act of being.

A sentence like *Help yourself* looks like an exception to the rule until we realize it's shorthand for **You may help yourself**.

In certain cases, a reflexive pronoun may come first.

Example: *Doubting himself, the man proceeded cautiously.*

Reflexive pronouns are also used for emphasis.

Example: *He himself finished the whole job.*

Rule 11a. Avoid *they* and *their* with singular pronouns.

Incorrect: *Someone brought their lunch.*

Correct: *Someone brought her lunch.*

OR

Someone brought his lunch.

If the gender is undetermined, you could say *Someone brought his or her lunch* (more on this option in Rule 11b).

Rule 11b. Singular pronouns must stay singular throughout the sentence.

Incorrect: *Someone has to do it—and they have to do it well.*

The problem is that *someone* is singular, but *they* is plural. If we change *they* to *he or she*, we get a rather clumsy sentence, even if it is technically correct.

Technically correct: *Someone has to do it—and he or she has to do it well.*

Replacing an ungrammatical sentence with a poorly written correction is a bad bargain. The better option is to rewrite.

Rewritten: *Someone has to do it—and has to do it well.*

Many writers abhor the *he or she* solution. Following are more examples of why rewriting is a better idea than using *he or she* or *him or her* to make sentences grammatical.

Incorrect: *No one realizes when their time is up.*

Correct but awkward: *No one realizes when his or her time is up.*

Rewritten: *None realize when their time is up.*

Incorrect: *If you see anyone on the trail, tell them to be careful.*

Correct but awkward: *If you see anyone on the trail, tell him or her to be careful.*

Rewritten: *Tell anyone you see on the trail to be careful.*

Rule 12. When a pronoun is linked with a noun by *and*, mentally remove the *and + noun* phrase to avoid trouble.

Incorrect: *Her and her friend came over.*

If we remove *and her friend*, we're left with the ungrammatical *Her came over.*

Correct: *She and her friend came over.*

Incorrect: *I invited he and his wife.*

If we remove *and his wife*, we're left with the ungrammatical *I invited he*.

Correct: *I invited him and his wife.*

Incorrect: *Bill asked my sister and I.*

If we remove *my sister and*, we're left with the ungrammatical *Bill asked I*.

Correct: *Bill asked my sister and me.*

NOTE

Do not combine a subject pronoun and an object pronoun in phrases like *her and I* or *he and me*. Whenever *and* or *or* links an object pronoun (*her, me*) and a subject pronoun (*he, I*), one of those pronouns will always be wrong.

Incorrect: *Her and I went home.*

Correct: *She and I went home. (She went and I went.)*

WHO VS. WHOM

Rule. Use this *he/him* method to decide whether *who* or *whom* is correct:

he = *who*

him = *whom*

Examples: *Who/Whom wrote the letter?*

He wrote the letter. Therefore, *who* is correct.

Who/Whom should I vote for?

Should I vote for *him*? Therefore, *whom* is correct.

We all know who/whom pulled that prank.

This sentence contains two clauses: *we all know* and *who/whom pulled that prank*. We are interested in the second clause because it contains the *who/whom*. *He* pulled that prank. Therefore, *who* is correct.

We wondered who/whom the book was about.

This sentence contains two clauses: *we wondered* and *who/whom the book was about*. Again, we are interested in the second clause because it contains the *who/whom*. The book was about *him*. Therefore, *whom* is correct.

Note: This rule is compromised by an odd infatuation people have with *whom*—and not for good reasons. At its worst, the use of *whom* becomes a form of one-upmanship some employ to appear sophisticated. The following is an example of the pseudo-sophisticated *whom*.

Incorrect: *a woman whom I think is a genius*

In this case *whom* is not the object of *I think*. Put *I think* at the end and witness the folly: *a woman whom is a genius, I think.*

Correct: *a woman who I think is a genius*

Learn to spot and avoid this too-common pitfall.

WHOEVER VS. WHOMEVER

To determine whether to use *whoever* or *whomever*, the *he/him* rule in the previous section applies:

he = *whoever*

him = *whomever*

Rule 1. The presence of *whoever* or *whomever* indicates a dependent clause. Use *whoever* or *whomever* to agree with the verb in that dependent clause, regardless of the rest of the sentence.

Examples: *Give it to whoever/whomever asks for it first.*

He asks for it first. Therefore, whoever is correct.

We will hire whoever/whomever you recommend.

You recommend him. Therefore, whomever is correct.

We will hire whoever/whomever is most qualified.

He is most qualified. Therefore, whoever is correct.

Rule 2. When the entire *whoever/whomever* clause is the subject of the verb that follows the clause, analyze the clause to determine whether to use *whoever* or *whomever*.

Examples: *Whoever is elected will serve a four-year term.*

Whoever is the subject of is elected. The clause whoever is elected is the subject of will serve.

Whomever you elect will serve a four-year term.

Whomever is the object of elect. Whomever you elect is the subject of will serve.

A word to the wise: *Whomever* is even more of a vogue word than *whom*. Many use it indiscriminately to sound cultured, figuring that no one will know any better.

WHO, THAT, WHICH

Rule 1. *Who* and sometimes *that* refer to people. *That* and *which* refer to groups or things.

Examples: Anya is the one **who** rescued the bird.

“*The Man That Got Away*” is a great song with a grammatical title.

Lokua is on the team **that** won first place.

She belongs to a great organization, **which** specializes in saving endangered species.

Rule 2a. *That* introduces what is called an **essential clause**. Essential clauses add information that is vital to the point of the sentence.

Example: I do not trust products **that** claim “all natural ingredients” because this phrase can mean almost anything.

We would not know the type of products being discussed without the *that* clause.

Rule 2b. *Which* introduces a **nonessential clause**, which adds supplementary information.

Example: The product claiming “all natural ingredients,” **which** appeared in the Sunday newspaper, is on sale.

The product is already identified. Therefore, *which* begins a nonessential clause containing additional, but not essential, information.

NOTE

Essential clauses do not have commas introducing or surrounding them, whereas nonessential clauses are introduced or surrounded by commas.

Rule 3. If *that* has already appeared in a sentence, writers sometimes use *which* to introduce the next clause, whether it is essential or nonessential. This is done to avoid awkward formations.

Example: *That which doesn't kill you makes you stronger.*

This sentence is far preferable to the ungainly but technically correct *That that doesn't kill you makes you stronger.*

NOTE

The distinction between *that* and *which*, though a useful guideline, is widely disregarded: *Which* is routinely used in place of *that*, even by great writers and journalists, perhaps because it sounds more elegant.

ADJECTIVES AND ADVERBS

Definitions

- An **adjective** is a word or set of words that **modifies** (i.e., describes) a noun or pronoun. Adjectives may come before the word they modify.

Examples: *That is a **cute** puppy.*

*She likes a **high school** senior.*

Adjectives may also follow the word they modify:

Examples: *That puppy looks **cute**.*

*The technology is **state-of-the-art**.*

- An **adverb** is a word or set of words that modifies verbs, adjectives, or other adverbs.

Examples: *He speaks **slowly*** (modifies the verb *speaks*)

*He is **especially** clever* (modifies the adjective *clever*)

*He speaks **all too** slowly* (modifies the adverb *slowly*)

An adverb answers how, when, where, or to what extent—how often or how much (e.g., *daily*, *completely*).

Examples: *He speaks **slowly*** (answers the question *how*)

*He speaks **very** slowly* (answers the question *how slowly*)

Rule 1. Many adverbs end in *-ly*, but many do not. Generally, if a word can have *-ly* added to its adjective form, place it there to form an adverb.

Examples: *She thinks quick/quickly.*

How does she think? *Quickly.*

She is a quick/quickly thinker.

Quick is an adjective describing *thinker*, so no *-ly* is attached.

She thinks fast/fastly.

Fast answers the question *how*, so it is an adverb. But *fast* never has *-ly* attached to it.

We performed bad/badly.

Badly describes *how* we performed, so *-ly* is added.

Rule 2. Adverbs that answer the question *how* sometimes cause grammatical problems. It can be a challenge to determine if *-ly* should be attached. Avoid the trap of *-ly* with linking verbs, such as *taste, smell, look, feel*, etc., that pertain to the senses. Adverbs are often misplaced in such sentences, which require adjectives instead.

Examples: *Roses smell sweet/sweetly.*

Do the roses actively smell with noses? No; in this case, *smell* is a linking verb—which requires an adjective to modify *roses*—so no *-ly*.

The woman looked angry/angrily to us.

Did the woman look with her eyes, or are we describing her appearance?

We are describing her appearance (she appeared angry), so no *-ly*.

The woman looked angry/angrily at the paint splotches.

Here the woman actively looked (used her eyes), so the *-ly* is added.

She feels bad/badly about the news.

She is not feeling with fingers, so no *-ly*.

Rule 3. The word *good* is an adjective, whose adverb equivalent is *well*.

Examples: *You did a good job.*

Good describes the job.

You did the job well.

Well answers *how*.

You smell good today.

Good describes your fragrance, not how you smell with your nose, so using the adjective is correct.

You smell well for someone with a cold.

You are actively smelling with your nose here, so use the adverb.

Rule 4. The word *well* can be an adjective, too. When referring to health, we often use *well* rather than *good*.

Examples: You do not look well today.
I don't feel well, either.

Rule 5. Adjectives come in three forms, also called **degrees**. An adjective in its normal or usual form is called a **positive degree adjective**. There are also the **comparative** and **superlative** degrees, which are used for comparison, as in the following examples:

Positive	Comparative	Superlative
sweet	sweeter	sweetest
bad	worse	worst
efficient	more efficient	most efficient

A common error in using adjectives and adverbs arises from using the wrong form of comparison. To compare two things, always use a **comparative** adjective:

Example: She is the *cleverer* of the two women (never cleverest)

The word *cleverest* is what is called the **superlative** form of *clever*. Use it only when comparing three or more things:

Example: She is the *cleverest* of them all.

Incorrect: Chocolate or vanilla: which do you like best?

Correct: Chocolate or vanilla: which do you like **better**?

Rule 6. There are also three degrees of adverbs. In formal usage, do not drop the *-ly* from an adverb when using the comparative form.

Incorrect: She spoke quicker than he did.

Correct: She spoke **more quickly** than he did.

Incorrect: Talk quieter.

Correct: Talk **more quietly**.

Rule 7. When *this*, *that*, *these*, and *those* are followed by a noun, they are adjectives. When they appear without a noun following them, they are pronouns.

Examples: This house is for sale.
This is an adjective.
This is *for sale*.
This is a pronoun.

PREPOSITIONS

Definition

- A **preposition** is a word that indicates location (*in, near, beside*) or some other relationship (*about, after, besides*) between a noun or pronoun and other parts of the sentence. A preposition isn't a preposition unless it goes with a related noun or pronoun, called the **object of the preposition**.

Examples: Let's meet before noon.

Before is a preposition; noon is its object.

We've never met before.

There is no object; before is an adverb modifying met.

Rule 1. A preposition generally, but not always, goes before its noun or pronoun. One of the undying myths of English grammar is that you may not end a sentence with a preposition. But look at the first example that follows. No one should feel compelled to say, or even write, *That is something with which I cannot agree*. Just do not use extra prepositions when the meaning is clear without them.

Correct: That is something I cannot agree **with**.

Correct: Where did you get this?

Incorrect: Where did you get this **at**?

Correct: How many of you can I depend **on**?

Correct: Where did he go?

Incorrect: Where did he go **to**?

Rule 2a. The preposition *like* means “similar to” or “similarly to.” It should be followed by an object of the preposition (noun, pronoun, noun phrase), not by a subject and verb. Rule of thumb: Avoid *like* when a verb is involved.

Correct: You look like your mother.

That is, you look similar to her. (Mother is the object of the preposition *like*.)

Incorrect: You look like your mother does.

(Avoid *like* with noun + verb.)

Rule 2b. Instead of *like*, use *as*, *as if*, *as though*, or *the way* when following a comparison with a subject and verb.

Correct: You look *the way* your mother does.

Incorrect: Do like I ask. (No one would say Do similarly to I ask.)

Correct: Do *as* I ask.

Incorrect: You look like you're angry.

Correct: You look *as if* you're angry. (OR *as though*)

Some speakers and writers, to avoid embarrassment, use *as* when they mean *like*. The following incorrect sentence came from a grammar guide:

Incorrect: They are considered *as* any other English words.

Correct: They are considered *as* any other English words *would be*.

Correct: They are considered *to be like* any other English words.

Remember: *like* means “similar to” or “similarly to”; *as* means “in the same manner that.” Rule of thumb: Do not use *as* unless there is a verb involved.

Incorrect: I, *as* most people, try to use good grammar.

Correct: I, *like* most people, try to use good grammar.

Correct: I, *as* most people *do*, try to use good grammar.

NOTE

The rule distinguishing *like* from *as*, *as if*, *as though*, and *the way* is increasingly ignored, but English purists still insist upon it.

Rule 3. The preposition *of* should never be used in place of the helping verb *have*.

Correct: I should *have* done it.

Incorrect: I should *of* done it.

Rule 4. Follow *different* with the preposition *from*. Things differ *from* other things; avoid *different than*.

Incorrect: You're different than I am.

Correct: You're different *from* me.

Rule 5. Use *into* rather than *in* to express motion toward something. Use *in* to tell the location.

- Correct:** *I swam in the pool.*
Correct: *I walked into the house.*
Correct: *I looked into the matter.*
Incorrect: *I dived in the water.*
Correct: *I dived into the water.*
Incorrect: *Throw it in the trash.*
Correct: *Throw it into the trash.*

EFFECTIVE WRITING

Rule 1. Use concrete rather than vague language.

- Vague:** *The weather was of an extreme nature on the West Coast.*
This sentence raises frustrating questions: When did this extreme weather occur? What does “of an extreme nature” mean? Where on the West Coast did this take place?
Concrete: *California had unusually cold weather last week.*

Rule 2. Use **active voice** whenever possible. Active voice means the subject is performing the verb. **Passive voice** means the subject receives the action.

- Active:** *Barry hit the ball.*
Passive: *The ball was hit.*

Notice that the party responsible for the action—in the previous example, whoever hit the ball—may not even appear when using passive voice. So passive voice is a useful option when the responsible party is not known.

- Example:** *My watch was stolen.*

NOTE

The passive voice has often been criticized as something employed by people in power to avoid responsibility:

- Example:** *Mistakes were made.*
Translation: *I made mistakes.*

Rule 3. Avoid overusing *there is*, *there are*, *it is*, *it was*, etc.

Example: *There is a case of meningitis that was reported in the newspaper.*

Revision: *A case of meningitis was reported in the newspaper.*

Even better: *The newspaper reported a case of meningitis.* (Active voice)

Example: *It is important to signal before making a left turn.*

Revision: *Signaling before making a left turn is important.*

OR

Signaling before a left turn is important.

OR

You should signal before making a left turn.

Example: *There are some revisions that must be made.*

Revision: *Some revisions must be made.* (Passive voice)

Even better: *Please make some revisions.* (Active voice)

Rule 4. To avoid confusion (and pompousness), don't use two negatives to make a positive without good reason.

Unnecessary: *He is not unwilling to help.*

Better: *He is willing to help.*

Sometimes a *not un-* construction may be desirable, perhaps even necessary:

Example: *The book is uneven but not uninteresting.*

However, the novelist-essayist George Orwell warned of its abuse with this deliberately silly sentence: "A not unblack dog was chasing a not unsmall rabbit across a not ungreen field."

Rule 5. Use consistent grammatical form when offering several ideas. This is called **parallel construction**.

Correct: *I admire people who are honest, reliable, and sincere.*

Note that *are* applies to and makes sense with each of the three adjectives at the end.

Incorrect: *I admire people who are honest, reliable, and have sincerity.*

In this version, *are* does not make sense with *have sincerity*, and *have sincerity* doesn't belong with the two adjectives *honest* and *reliable*.

Correct: You should check your spelling, grammar, and punctuation.

Note that *check your* applies to and makes sense with each of the three nouns at the end.

Incorrect: You should check your spelling, grammar, and punctuate properly.

Here, *check your* does not make sense with *punctuate properly*, and *punctuate properly* doesn't belong with the two nouns *spelling* and *grammar*. The result is a jarringly inept sentence.

Rule 6. Word order can make or ruin a sentence. If you start a sentence with an incomplete phrase or clause, such as *While crossing the street* or *Forgotten by history*, it must be followed closely by the person or thing it describes. Furthermore, that person or thing is always the main subject of the sentence. Breaking this rule results in the dreaded, all-too-common **dangling modifier**, or **dangler**.

Dangler: *Forgotten by history, his autograph was worthless.*

The problem: *his autograph* shouldn't come right after *history*, because *he* was forgotten, not *his autograph*.

Correct: *He was forgotten by history, and his autograph was worthless.*

Dangler: *Born in Chicago, my first book was about the 1871 fire.*

The problem: the sentence wants to say *I* was born in Chicago, but to a careful reader, it says that *my first book* was born there.

Correct: *I was born in Chicago, and my first book was about the 1871 fire.*

Adding *-ing* to a verb (as in *crossing* in the example that follows) results in a versatile word called a **participle**, which can be a noun, adjective, or adverb. Rule 6 applies to all sentences with a participle in the beginning. Participles require placing the actor immediately after the opening phrase or clause.

Dangler: *While crossing the street, the bus hit her.* (Wrong: the bus was not crossing.)

Correct: *While crossing the street, she was hit by a bus.*

OR

She was hit by a bus while crossing the street.

Rule 7. Place descriptive words and phrases as close as is practical to the words they modify.

Ill-advised: *I have a cake that Mollie baked in my lunch bag.*

Cake is too far from *lunch bag*, making the sentence ambiguous and silly.

Better: *In my lunch bag is a cake that Mollie baked.*

Rule 8. A sentence fragment is usually an oversight, or a bad idea. It occurs when you have only a phrase or dependent clause but are missing an independent clause.

Sentence fragment: *After the show ended.*

Full sentence: *After the show ended, we had coffee.*

CHAPTER 2

PUNCTUATION

PERIODS

Rule 1. Use a period at the end of a complete sentence that is a statement.

Example: *I know him well.*

Rule 2. If the last item in the sentence is an abbreviation that ends in a period, do not follow it with another period.

Incorrect: *This is Alice Smith, M.D..*

Correct: *This is Alice Smith, M.D.*

Correct: *Please shop, cook, etc. We will do the laundry.*

Rule 3. Question marks and exclamation points replace and eliminate periods at the end of a sentence.

COMMAS

Commas and **periods** are the most frequently used punctuation marks. Commas customarily indicate a brief pause; they're not as final as periods.

Rule 1. Use commas to separate words and word groups in a simple series of three or more items.

Example: *My estate goes to my husband, son, daughter-in-law, and nephew.*

Note: When the last comma in a series comes before *and* or *or* (after *daughter-in-law* in the above example), it is known as the **Oxford comma**. Most newspapers and magazines drop the Oxford comma in a simple series, apparently feeling it's unnecessary. However, omission of the Oxford comma can sometimes lead to misunderstandings.

Example: *We had coffee, cheese and crackers and grapes.*

Adding a comma after *crackers* makes it clear that *cheese and crackers* represents one dish. In cases like this, clarity demands the Oxford comma.

We had coffee, cheese and crackers, and grapes.

Fiction and nonfiction books generally prefer the Oxford comma. Writers must decide Oxford or no Oxford and not switch back and forth, except when omitting the Oxford comma could cause confusion as in the *cheese and crackers* example.

Rule 2. Use a comma to separate two adjectives when the adjectives are interchangeable.

Example: *He is a strong, healthy man.*

We could also say *healthy, strong man.*

Example: *We stayed at an expensive summer resort.*

We would not say *summer expensive resort*, so no comma.

Rule 3a. Many inexperienced writers run two independent clauses together by using a comma instead of a period. This results in the dreaded **run-on sentence** or, more technically, a **comma splice**.

Incorrect: *He walked all the way home, he shut the door.*

There are several simple remedies:

Correct: *He walked all the way home. He shut the door.*

Correct: *After he walked all the way home, he shut the door.*

Correct: *He walked all the way home, and he shut the door.*

Rule 3b. In sentences where two independent clauses are joined by connectors such as *and*, *or*, *but*, etc., put a comma at the end of the first clause.

Incorrect: *He walked all the way home and he shut the door.*

Correct: *He walked all the way home, and he shut the door.*

Some writers omit the comma if the clauses are both quite short:

Example: *I paint and he writes.*

Rule 3c. If the subject does not appear in front of the second verb, a comma is generally unnecessary.

Example: *He thought quickly but still did not answer correctly.*

Rule 4a. Use a comma after certain words that introduce a sentence, such as *well, yes, why, hello, hey, etc.*

Examples: *Why, I can't believe this!*

No, you can't have a dollar.

Rule 4b. Use commas to set off expressions that interrupt the sentence flow (*nevertheless, after all, by the way, on the other hand, however, etc.*).

Example: *I am, by the way, very nervous about this.*

Rule 5. Use commas to set off the name, nickname, term of endearment, or title of a person directly addressed.

Examples: *Will you, Aisha, do that assignment for me?*

Yes, old friend, I will.

Good day, Captain.

Rule 6. Use a comma to separate the day of the month from the year, and—what most people forget!—always put one after the year, also.

Example: *It was in the Sun's June 5, 2003, edition.*

No comma is necessary for just the month and year.

Example: *It was in a June 2003 article.*

Rule 7. Use a comma to separate a city from its state, and remember to put one after the state, also.

Example: *I'm from the Akron, Ohio, area.*

Rule 8. Traditionally, if a person's name is followed by *Sr.* or *Jr.*, a comma follows the last name: *Martin Luther King, Jr.* This comma is no longer considered mandatory. However, if a comma does precede *Sr.* or *Jr.*, another comma must follow the entire name when it appears midsentence.

Correct: Al Mooney Sr. is here.

Correct: Al Mooney, Sr., is here.

Incorrect: Al Mooney, Sr. is here.

Rule 9. Similarly, use commas to enclose degrees or titles used with names.

Example: Al Mooney, M.D., is here.

Rule 10. When starting a sentence with a dependent clause, use a comma after it.

Example: If you are not sure about this, let me know now.

But often a comma is unnecessary when the sentence starts with an independent clause followed by a dependent clause.

Example: Let me know now if you are not sure about this.

Rule 11. Use commas to set off nonessential words, clauses, and phrases (see the “Who, That, Which” section in Chapter One, Rule 2b).

Incorrect: Jill who is my sister shut the door.

Correct: Jill, who is my sister, shut the door.

Incorrect: The man knowing it was late hurried home.

Correct: The man, knowing it was late, hurried home.

In the preceding examples, note the comma after *sister* and *late*. Nonessential words, clauses, and phrases that occur midsentence must be enclosed by commas. The closing comma is called an **appositive comma**. Many writers forget to add this important comma. Following are two instances of the need for an appositive comma with one or more nouns.

Incorrect: My best friend, Joe arrived.

Correct: My best friend, Joe, arrived.

Incorrect: The three items, a book, a pen, and paper were on the table.

Correct: The three items, a book, a pen, and paper, were on the table.

Rule 12. If something or someone is sufficiently identified, the description that follows is considered nonessential and should be surrounded by commas.

Examples: Freddy, who has a limp, was in an auto accident.

If we already know which Freddy is meant, the description is not essential.

The boy who has a limp was in an auto accident.

We do not know which boy is meant without further description; therefore, no commas are used.

This leads to a persistent problem. Look at the following sentence:

Example: *My brother Bill is here.*

Now, see how adding two commas changes that sentence's meaning:

Example: *My brother, Bill, is here.*

Careful writers and readers understand that the first sentence means I have more than one brother. The commas in the second sentence mean that Bill is my only brother.

Why? In the first sentence, *Bill* is essential information: it identifies which of my two (or more) brothers I'm speaking of. This is why no commas enclose *Bill*.

In the second sentence, *Bill* is nonessential information—whom else but Bill could I mean?—hence the commas.

Comma misuse is nothing to take lightly. It can lead to a train wreck like this:

Example: *Mark Twain's book, Tom Sawyer, is a delight.*

Because of the commas, that sentence states that Twain wrote only one book. In fact, he wrote more than two dozen of them.

Rule 13a. Use commas to introduce or interrupt direct quotations.

Examples: *He said, "I don't care."*

"Why," I asked, "don't you care?"

This rule is optional with one-word quotations.

Example: *He said "Stop."*

Rule 13b. If the quotation comes before *he said*, *she wrote*, *they reported*, *Dana insisted*, or a similar attribution, end the quoted material with a comma, even if it is only one word.

Examples: *"I don't care," he said.*

"Stop," he said.

Rule 14. Use a comma to separate a statement from a question.

Example: *I can go, can't I?*

Rule 15. Use a comma to separate contrasting parts of a sentence.

Example: *That is my money, not yours.*

Rule 16a. Use a comma before and after certain introductory words or terms, such as *namely*, *that is*, *i.e.*, *e.g.*, and *for instance*, when they are followed by a series of items.

Example: You may be required to bring many items, e.g., sleeping bags, pans, and warm clothing.

Rule 16b. Commas should precede the term *etc.* and enclose it if it is placed midsentence.

Example: Sleeping bags, pans, warm clothing, etc., are in the tent.

NOTE

The abbreviation *i.e.* means “that is”; *e.g.* means “for example.”

SEMICOLONS

It's no accident that a **semicolon** is a period atop a comma. Like commas, semicolons indicate an audible pause—slightly longer than a comma's, but short of a period's full stop.

Semicolons have other functions, too. But first, a caveat: avoid the common mistake of using a semicolon to replace a colon (see the “Colons” section).

Incorrect: I have one goal; to find her.

Correct: I have one goal: to find her.

Rule 1. A semicolon can replace a period if the writer wishes to narrow the gap between two closely linked sentences.

Examples: Call me tomorrow; you can give me an answer then.

We have paid our dues; we expect all the privileges listed in the contract.

Rule 2. Use a semicolon before such words and terms as *namely*, *however*, *therefore*, *that is*, *i.e.*, *for example*, *e.g.*, *for instance*, etc., when they introduce a complete sentence. It is also preferable to use a comma after these words and terms.

Example: Bring any two items; however, sleeping bags and tents are in short supply.

Rule 3. Use a semicolon to separate units of a series when one or more of the units contain commas.

Incorrect: The conference has people who have come from Moscow, Idaho, Springfield, California, Alamo, Tennessee, and other places as well.
Note that with only commas, that sentence is hopeless.

Correct: *The conference has people who have come from Moscow, Idaho; Springfield, California; Alamo, Tennessee; and other places as well.*

Rule 4. A semicolon may be used between independent clauses joined by a connector, such as *and, but, or, nor*, etc., when one or more commas appear in the first clause.

Example: *When I finish here, and I will soon, I'll be glad to help you; and that is a promise I will keep.*

COLONS

A **colon** means “that is to say” or “here’s what I mean.” Colons and semicolons should never be used interchangeably.

Rule 1. Use a colon to introduce a series of items. Do not capitalize the first item after the colon (unless it’s a proper noun).

Examples: *You may be required to bring many things: sleeping bags, pans, utensils, and warm clothing.*

I want the following items: butter, sugar, and flour.

I need an assistant who can do the following: input data, write reports, and complete tax forms.

Rule 2. Avoid using a colon before a list when it directly follows a verb or preposition.

Incorrect: *I want: butter, sugar, and flour.*

Correct: *I want the following: butter, sugar, and flour.*

OR

I want butter, sugar, and flour.

Incorrect: *I've seen the greats, including: Barrymore, Guinness, and Streep.*

Correct: *I've seen the greats, including Barrymore, Guinness, and Streep.*

Rule 3. When listing items one by one, one per line, following a colon, capitalization and ending punctuation are optional when using single words or phrases preceded by letters, numbers, or bullet points. If each point is a complete sentence, capitalize the first word and end the sentence with appropriate ending punctuation. Otherwise, there are no hard and fast rules, except be consistent.

Examples: I want an assistant who can do the following:

- (a) input data
- (b) write reports
- (c) complete tax forms

The following are requested:

- Wool sweaters for possible cold weather.
- Wet suits for snorkeling.
- Introductions to the local dignitaries.

These are the pool rules:

1. Do not run.
2. If you see unsafe behavior, report it to the lifeguard.
3. Did you remember your towel?
4. Have fun!

Rule 4. A colon instead of a semicolon may be used between independent clauses when the second sentence explains, illustrates, paraphrases, or expands on the first sentence.

Example: *He got what he worked for: he really earned that promotion.*

If a complete sentence follows a colon, as in the previous example, it is up to the writer to decide whether to capitalize the first word. Although generally advisable, capitalizing a sentence after a colon is often a judgment call.

Note: A capital letter generally does not introduce a simple phrase following a colon.

Example: *He got what he worked for: a promotion.*

Rule 5. A colon may be used to introduce a long quotation. Some style manuals say to indent one-half inch on both the left and right margins; others say to indent only on the left margin. Quotation marks are not used.

Example: *The author of Touched, Jane Straus, wrote in the first chapter:*

*Georgia went back to her bed and stared at the intricate patterns of
burned moth wings in the translucent glass of the overhead light.
Her father was in “hyper mode” again where nothing could calm
him down.*

Rule 6. Use a colon rather than a comma to follow the salutation in a business letter, even when addressing someone by his or her first name. (Never use a semicolon after a salutation.) A comma is used after the salutation in more informal correspondence.

Formal: Dear Ms. Rodriguez:

Informal: Dear Dave,

QUOTATION MARKS

The rules set forth in this section are customary in the United States. Great Britain and other countries in the Commonwealth of Nations are governed by quite different conventions. Nowhere is this more apparent than in Rule 3a in this section, a rule that has the advantage of being far simpler than Britain's and the disadvantage of being far less logical.

Rule 1. Use double quotation marks to set off a direct (word-for-word) quotation.

Correct: “When will you be here?” he asked.

Incorrect: He asked “when I would be there.”

Rule 2. Either quotation marks or italics are customary for titles: magazines, books, plays, films, songs, poems, article titles, chapter titles, etc.

Rule 3a. Periods and commas ALWAYS go inside quotation marks.

Examples: The sign said, “Walk.” Then it said, “Don’t Walk,” then, “Walk,” all within thirty seconds.

He yelled, “Hurry up.”

Rule 3b. Use single quotation marks for quotations within quotations.

Example: He said, “Dan cried, ‘Do not treat me that way.’”

Note that the period goes inside both the single and double quotation marks.

Rule 4. As a courtesy, make sure there is visible space at the start or end of a quotation between adjacent single and double quotation marks. (Your word processing program may do this automatically.)

Not ample space: He said, “Dan cried, ‘Do not treat me that way.’”

Ample space: He said, “Dan cried, ‘Do not treat me that way.’”

Rule 5a. Quotation marks are often used with technical terms, terms used in an unusual way, or other expressions that vary from standard usage.

Examples: It’s an oil-extraction method known as “fracking.”

He did some “experimenting” in his college days.

I had a visit from my “friend” the tax man.

Rule 5b. Never use single quotation marks in sentences like the previous three.

Incorrect: I had a visit from my ‘friend’ the tax man.

The single quotation marks in the above sentence are intended to send a message to the reader that *friend* is being used in a special way: in this case, sarcastically. Avoid this invalid usage. Single quotation marks are valid only within a quotation, as per Rule 3b, above.

Rule 6. When quoted material runs more than one paragraph, start each new paragraph with opening quotation marks, but do not use closing quotation marks until the end of the passage.

Example: She wrote: “I don’t paint anymore. For a while I thought it was just a phase that I’d get over.
“Now, I don’t even try.”

PARENTHESES AND BRACKETS

Parentheses and brackets must never be used interchangeably.

Parentheses

Rule 1. Use parentheses to enclose information that clarifies or is used as an aside.

Example: He finally answered (after taking five minutes to think) that he did not understand the question.

If material in parentheses ends a sentence, the period goes after the parentheses.

Example: He gave me a nice bonus (\$500).

Commas could have been used in the first example; a colon could have been used in the second example. The use of parentheses indicates that the writer considered the information less important—almost an afterthought.

Rule 2. Periods go inside parentheses only if an entire sentence is inside the parentheses.

Example: Please read the analysis. (You’ll be amazed.)

This is a rule with a lot of wiggle room. An entire sentence in parentheses is often acceptable without an enclosed period:

Example: Please read the analysis (you’ll be amazed).

Rule 3. Parentheses, despite appearances, are not part of the subject.

Example: *Joe (and his trusty mutt) was always welcome.*

If this seems awkward, try rewriting the sentence:

Example: *Joe (accompanied by his trusty mutt) was always welcome.*

Rule 4. Commas are more likely to follow parentheses than precede them.

Incorrect: *When he got home, (it was already dark outside) he fixed dinner.*

Correct: *When he got home (it was already dark outside), he fixed dinner.*

Brackets

Brackets are far less common than parentheses, and they are only used in special cases. Brackets (like single quotation marks) are used exclusively within quoted material.

Rule 1. Brackets are interruptions. When we see them, we know they've been added by someone else. They are used to explain or comment on the quotation.

Examples: “*Four score and seven [today we'd say eighty-seven] years ago...*”
“*Bill shook hands with [his son] Al.*”

Rule 2. When quoting something that has a spelling or grammar mistake or presents material in a confusing way, insert the term *sic* in italics and enclose it in nonitalic (unless the surrounding text is italic) brackets.

Sic (“thus” in Latin) is shorthand for, “This is exactly what the original material says.”

Example: *She wrote, “I would rather die then [sic] be seen wearing the same outfit as my sister.”*

The [sic] indicates that *then* was mistakenly used instead of *than*.

Rule 3. In formal writing, brackets are often used to maintain the integrity of both a quotation and the sentences others use it in.

Example: “[*T*he better angels of our nature” gave a powerful ending to Lincoln’s first inaugural address.

Lincoln’s memorable phrase came midsentence, so the word *the* was not originally capitalized.

APOSTROPHES

Rule 1a. Use the **apostrophe** to show possession. To show possession with a singular noun, add an apostrophe plus the letter s.

Examples: *a woman's hat*
the boss's wife
Mrs. Chang's house

Rule 1b. Many common nouns end in the letter s (*lens, cactus, bus*, etc.). So do a lot of proper nouns (*Mr. Jones, Texas, Christmas*). There are conflicting policies and theories about how to show possession when writing such nouns. There is no right answer; the best advice is to choose a formula and stay consistent.

Rule 1c. Some writers and editors add only an apostrophe to all nouns ending in s. And some add an apostrophe + s to every proper noun, be it *Hastings's* or *Jones's*.

One method, common in newspapers and magazines, is to add an apostrophe + s ('s) to common nouns ending in s, but only a stand-alone apostrophe to proper nouns ending in s.

Examples: *the class's hours*
Mr. Jones' golf clubs
the canvas's size
Texas' weather

Care must be taken to place the apostrophe outside the word in question. For instance, if talking about a pen belonging to Mr. Hastings, many people would wrongly write *Mr. Hasting's pen* (his name is not Mr. Hasting).

Correct: *Mr. Hastings' pen*

Another widely used technique is to write the word as we would speak it. For example, since most people saying, “*Mr. Hastings' pen*” would not pronounce an added s, we would write *Mr. Hastings' pen* with no added s. But most people would pronounce an added s in “*Jones's*,” so we'd write it as we say it: *Mr. Jones's golf clubs*. This method explains the punctuation of *for goodness' sake*.

Rule 2a. Regular nouns are nouns that form their plurals by adding either the letter s or -es (*guy, guys; letter, letters; actress, actresses; etc.*). To show plural possession, simply put an apostrophe after the s.

Correct: *guys' night out* (*guy + s + apostrophe*)
Incorrect: *guy's night out* (*implies only one guy*)
Correct: *two actresses' roles* (*actress + es + apostrophe*)
Incorrect: *two actress's roles*

Rule 2b. Do not use an apostrophe + s to make a regular noun plural.

Incorrect: Apostrophe's are confusing.

Correct: Apostrophes are confusing.

Incorrect: We've had many happy Christmas's.

Correct: We've had many happy Christmases.

In special cases, such as when forming a plural of a word that is not normally a noun, some writers add an apostrophe for clarity.

Example: Here are some do's and don'ts.

In that sentence, the verb *do* is used as a plural noun, and the apostrophe was added because the writer felt that *dos* was confusing. Not all writers agree; some see no problem with *dos and don'ts*.

Rule 2c. English also has many **irregular nouns** (*child, nucleus, tooth*, etc.). These nouns become plural by changing their spelling, sometimes becoming quite different words. You may find it helpful to write out the entire irregular plural noun before adding an apostrophe or an apostrophe + s.

Incorrect: two childrens' hats

The plural is *children*, not *childrens*.

Correct: two children's hats (*children* + apostrophe + s)

Incorrect: the teeths' roots

Correct: the teeth's roots

Rule 2d. Things can get really confusing with the possessive plurals of proper names ending in s, such as *Hastings* and *Jones*.

If you're the guest of the Ford family—the *Fords*—you're the *Fords'* guest (*Ford* + s + apostrophe). But what if it's the *Hastings* family?

Most would call them the “*Hastings*.” But that would refer to a family named “*Hasting*.” If someone's name ends in s, we must add -es for the plural. The plural of *Hastings* is *Hastingses*. The members of the *Jones* family are the *Joneses*.

To show possession, add an apostrophe.

Incorrect: the Hastings' dog

Correct: the Hastingses' dog (*Hastings* + es + apostrophe)

Incorrect: the Jones' car

Correct: the Joneses' car

In serious writing, this rule must be followed no matter how strange or awkward the results.

Rule 2e. Never use an apostrophe to make a name plural.

Incorrect: *The Wilson's are here.*

Correct: *The Wilsons are here.*

Incorrect: *We visited the Sanchez's.*

Correct: *We visited the Sanchezes.*

Rule 3. With a singular compound noun (for example, *mother-in-law*), show possession with an apostrophe + s at the end of the word.

Example: *my mother-in-law's hat*

If the compound noun (e.g., *brother-in-law*) is to be made plural, form the plural first (*brothers-in-law*), and then use the apostrophe + s.

Example: *my two brothers-in-law's hats*

Rule 4. If two people possess the same item, put the apostrophe + s after the second name only.

Example: *Cesar and Maribel's home is constructed of redwood.*

However, if one of the joint owners is written as a pronoun, use the possessive form for both.

Incorrect: *Maribel and my home*

Correct: *Maribel's and my home*

Incorrect: *he and Maribel's home*

Incorrect: *him and Maribel's home*

Correct: *his and Maribel's home*

In cases of separate rather than joint possession, use the possessive form for both.

Examples: *Cesar's and Maribel's homes are both lovely.*

They don't own the homes jointly.

Cesar and Maribel's homes are both lovely.

The homes belong to both of them.

Rule 5. Use an apostrophe with **contractions**. The apostrophe is placed where a letter or letters have been removed.

Examples: *doesn't, wouldn't, it's, can't, you've, etc.*

Incorrect: *does'nt*

Rule 6. There are various approaches to plurals for initials, capital letters, and numbers used as nouns.

Examples: *She consulted with three M.D.s.*

She consulted with three M.D.'s.

Some write M.D.'s to give the s separation from the second period.

Many writers and editors prefer an apostrophe after single capital letters only:

Examples: *I made straight A's.*

He learned his ABCs.

There are different schools of thought about years and decades. The following examples are all in widespread use:

Examples: *the 1990s*

the 1990's

the '90s

the 90's

Awkward: *the '90's*

Rule 7. Amounts of time or money are sometimes used as possessive adjectives that require apostrophes.

Incorrect: *three days leave*

Correct: *three days' leave*

Incorrect: *my two cents worth*

Correct: *my two cents' worth*

Rule 8. The personal pronouns *hers*, *ours*, *yours*, *theirs*, *its*, *whose*, and *oneself* never take an apostrophe.

Example: *Feed a horse grain. It's better for its health.*

Rule 9. When an apostrophe comes before a word or number, take care that it's truly an apostrophe (') rather than a single quotation mark (').

Incorrect: *'Twas the night before Christmas.*

Correct: *'Twas the night before Christmas.*

Incorrect: *I voted in '08.*

Correct: *I voted in '08.*

NOTE

Serious writers avoid the word '*til*' as an alternative to *until*. The correct word is *till*, which is many centuries older than *until*.

Rule 10. Beware of **false possessives**, which often occur with nouns ending in s. Don't add apostrophes to noun-derived adjectives ending in s. Close analysis is the best guide.

Incorrect: *We enjoyed the New Orleans' cuisine.*

In the preceding sentence, the word *the* makes no sense unless *New Orleans* is being used as an adjective to describe *cuisine*. In English, nouns frequently become adjectives. Adjectives rarely if ever take apostrophes.

Incorrect: *I like that Beatles' song.*

Correct: *I like that Beatles song.*

Again, *Beatles* is an adjective, modifying *song*.

Incorrect: *He's a United States' citizen.*

Correct: *He's a United States citizen.*

Rule 11. Beware of nouns ending in y; do not show possession by changing the y to -ies.

Correct: *the company's policy*

Incorrect: *the companies policy*

Correct: *three companies' policies*

HYPHENS

There are two commandments about this misunderstood punctuation mark. First, **hyphens** must never be used interchangeably with dashes (see the "Dashes" section), which are noticeably longer. Second, there should never be spaces around hyphens.

Incorrect: *300—325 people*

Incorrect: *300 - 325 people*

Correct: *300-325 people*

Hyphens' main purpose is to glue words together. They notify the reader that two or more elements in a sentence are linked. Although there are rules and customs governing hyphens, there are also situations when writers must decide whether to add them for clarity.

Hyphens Between Words

Rule 1. Generally, hyphenate two or more words when they come before a noun they modify and act as a single idea. This is called a **compound adjective**.

Examples: *an off-campus apartment*
state-of-the-art design

When a compound adjective follows a noun, a hyphen may or may not be necessary.

Example: *The apartment is off campus.*

However, some established compound adjectives are always hyphenated. Double-check with a dictionary or online.

Example: *The design is state-of-the-art.*

Rule 2a. A hyphen is frequently required when forming original compound verbs for vivid writing, humor, or special situations.

Examples: *The slacker video-gamed his way through life.*
Queen Victoria throne-sat for six decades.

Rule 2b. When writing out new, original, or unusual compound nouns, writers should hyphenate whenever doing so avoids confusion.

Examples: *I changed my diet and became a no-meater.*
No-meater is too confusing without the hyphen.
The slacker was a video gamer.
Video gamer is clear without a hyphen, although some writers might prefer to hyphenate it.

Writers using familiar compound verbs and nouns should consult a dictionary or look online to decide if these verbs and nouns should be hyphenated.

Rule 3. An often overlooked rule for hyphens: The adverb *very* and adverbs ending in *-ly* are not hyphenated.

Incorrect: *the very-elegant watch*
Incorrect: *the finely-tuned watch*

This rule applies only to adverbs. The following two sentences are correct because the *-ly* words are adjectives rather than adverbs:

Correct: *the friendly-looking dog*
Correct: *a family-owned cafe*

Rule 4. Hyphens are often used to tell the ages of people and things. A handy rule, whether writing about years, months, or any other period of time, is to use hyphens unless the period of time (years, months, weeks, days) is written in plural form:

With hyphens: *We have a two-year-old child.*

We have a two-year-old.

No hyphens: *The child is two years old.* (Because *years* is plural.)

Exception: *The child is one year old.* (Or *day, week, month*, etc.)

Note that when hyphens are involved in expressing ages, two hyphens are required. Many writers forget the second hyphen:

Incorrect: *We have a two-year old child.*

Without the second hyphen, the sentence is about an “old child.”

Rule 5. Never hesitate to add a hyphen if it solves a possible problem. Following are two examples of well-advised hyphens:

Confusing: *I have a few more important things to do.*

With hyphen: *I have a few more-important things to do.*

Without the hyphen, it’s impossible to tell whether the sentence is about a few things that are *more important* or a few more things that are all equally important.

Confusing: *He returned the stolen vehicle report.*

With hyphen: *He returned the stolen-vehicle report.*

With no hyphen, we could only guess: Was the *vehicle report* stolen, or was it a report on *stolen vehicles*?

Rule 6. When using numbers, hyphenate spans or estimates of time, distance, or other quantities. Remember not to use spaces around hyphens.

Examples: *3:15-3:45 p.m.*

1999-2016

300-325 people

Rule 7. Hyphenate all compound numbers from *twenty-one* through *ninety-nine*.

Examples: *thirty-two children*

one thousand two hundred twenty-one dollars

Rule 8. Hyphenate all spelled-out fractions.

Example: *more than two-thirds of registered voters*

Rule 9. Hyphenate most double last names.

Example: Sir Winthrop Heinz-Eakins will attend.

Rule 10. As important as hyphens are to clear writing, they can become an annoyance if overused. Avoid adding hyphens when the meaning is clear. Many phrases are so familiar (e.g., *high school*, *twentieth century*, *one hundred percent*) that they can go before a noun without risk of confusing the reader.

Examples: *a high school senior*
a twentieth century throwback
one hundred percent correct

Rule 11. When in doubt, look it up. Some familiar phrases may require hyphens. For instance, is a book *up to date* or *up-to-date*? Don't guess; have a dictionary close by, or look it up online.

Hyphens with Prefixes and Suffixes

A **prefix** (*a-*, *un-*, *de-*, *ab-*, *sub-*, *post-*, *anti-*, etc.) is a letter or set of letters placed before a **root** word. The word *prefix* itself contains the prefix *pre-*. Prefixes expand or change a word's meaning, sometimes radically: the prefixes *a-*, *un-*, and *dis-*, for example, change words into their opposites (e.g., *political*, *apolitical*; *friendly*, *unfriendly*; *honor*, *dishonor*).

Rule 1. Hyphenate prefixes when they come before proper nouns or proper adjectives.

Examples: *trans-American*
mid-July

Rule 2. For clarity, many writers hyphenate prefixes ending in a vowel when the root word begins with the same letter.

Examples: *ultra-ambitious*
semi-invalid
re-elect

Rule 3. Hyphenate all words beginning with the prefixes *self-*, *ex-* (i.e., *former*), and *all-*.

Examples: *self-assured*
ex-mayor
all-knowing

Rule 4. Use a hyphen with the prefix *re-* when omitting the hyphen would cause confusion with another word.

Examples: Will she recover from her illness?

I have re-covered the sofa twice.

Omitting the hyphen would cause confusion with *recover*.

I must re-press the shirt.

Omitting the hyphen would cause confusion with *repress*.

The stamps have been reissued.

A hyphen after *re-* is not needed because there is no confusion with another word.

Rule 5. Writers often hyphenate prefixes when they feel a word might be distracting or confusing without the hyphen.

Examples: de-ice

With no hyphen we get *deice*, which might stump readers.

co-worker

With no hyphen we get *coworker*, which could be distracting because it starts with *cow*.

A **suffix** (-y, -er, -ism, -able, etc.) is a letter or set of letters that follows a root word. Suffixes form new words or alter the original word to perform a different task. For example, the noun *scandal* can be made into the adjective *scandalous* by adding the suffix *-ous*. It becomes the verb *scandalize* by adding the suffix *-ize*.

Rule 1. Suffixes are not usually hyphenated. Some exceptions: *-style*, *-elect*, *-free*, *-based*.

Examples: Modernist-style paintings

Mayor-elect Smith

sugar-free soda

oil-based sludge

Rule 2. For clarity, writers often hyphenate when the last letter in the root word is the same as the first letter in the suffix.

Examples: graffiti-ism

wiretap-proof

Rule 3. Use discretion—and sometimes a dictionary—before deciding to place a hyphen before a suffix. But do not hesitate to hyphenate a rare usage if it avoids confusion.

Examples: *the annual dance-athon*
an eel-esque sea creature

Although the preceding hyphens help clarify unusual terms, they are optional and might not be every writer's choice. Still, many readers would scratch their heads for a moment over *danceathon* and *eelesque*.

DASHES

Dashes, like commas, semicolons, colons, ellipses, and parentheses, indicate added emphasis, an interruption, or an abrupt change of thought. Experienced writers know that these marks are not interchangeable. Note how dashes subtly change the tone of the following sentences:

Examples: *You are the friend, the only friend, who offered to help me.*
You are the friend—the only friend—who offered to help me.
I pay the bills; she has all the fun.
I pay the bills—she has all the fun.
I wish you would...oh, never mind.
I wish you would—oh, never mind.

Rule 1. Words and phrases between dashes are not generally part of the subject.

Example: *Joe—and his trusty mutt—was always welcome.*

Rule 2. Dashes replace otherwise mandatory punctuation, such as the commas after *Iowa* and *2013* in the following examples:

Without dash: *The man from Ames, Iowa, arrived.*
With dash: *The man—he was from Ames, Iowa—arrived.*
Without dash: *The May 1, 2013, edition of the Ames Sentinel arrived in June.*
With dash: *The Ames Sentinel—dated May 1, 2013—arrived in June.*

Rule 3. Some writers and publishers prefer spaces around dashes.

Example: *Joe — and his trusty mutt — was always welcome.*

ELLIPSES

Definition

- An **ellipsis** (plural: *ellipses*) is a punctuation mark consisting of three dots.

Use an ellipsis when omitting a word, phrase, line, paragraph, or more from a quoted passage. Ellipses save space or remove material that is less relevant. They are useful in getting right to the point without delay or distraction:

Full quotation: “Today, after hours of careful thought, we vetoed the bill.”

With ellipsis: “Today...we vetoed the bill.”

Although ellipses are used in many ways, the three-dot method is the simplest. Newspapers, magazines, and books of fiction and nonfiction use various approaches that they find suitable.

Some writers and editors feel that no spaces are necessary.

Example: I don’t know...I’m not sure.

Others enclose the ellipsis with a space on each side.

Example: I don’t know ... I’m not sure.

Still others put a space either directly before or directly after the ellipsis.

Examples: I don’t know ...I’m not sure.

I don’t know... I’m not sure.

A four-dot method and an even more rigorous method used in legal works require fuller explanations that can be found in other reference books.

Rule 1. Many writers use an ellipsis whether the omission occurs at the beginning of a sentence, in the middle of a sentence, or between sentences.

A common way to delete the beginning of a sentence is to follow the opening quotation mark with an ellipsis, plus a bracketed capital letter:

Example: “[A]fter hours of careful thought, we vetoed the bill.”

Other writers omit the ellipsis in such cases, feeling the bracketed capital letter gets the point across.

For more on brackets, see “Parentheses and Brackets,” earlier in this chapter.

Rule 2. Ellipses can express hesitation, changes of mood, suspense, or thoughts trailing off. Writers also use ellipses to indicate a pause or wavering in an otherwise straightforward sentence.

Examples: *I don't know...I'm not sure.*

Pride is one thing, but what happens if she...?

He said, "I...really don't...understand this."

QUESTION MARKS

Rule 1. Use a question mark only after a direct question.

Correct: *Will you go with me?*

Incorrect: *I'm asking if you will go with me?*

Rule 2a. A question mark replaces a period at the end of a sentence.

Incorrect: *Will you go with me?.*

Rule 2b. Because of Rule 2a, capitalize the word that follows a question mark.

Some writers choose to overlook this rule in special cases.

Example: *Will you go with me? with Joe? with anyone?*

Rule 3a. Avoid the common trap of using question marks with **indirect questions**, which are statements that contain questions. Use a period after an indirect question.

Incorrect: *I wonder if he would go with me?*

Correct: *I wonder if he would go with me.*

OR

I wonder: Would he go with me?

Rule 3b. Some sentences are statements—or demands—in the form of a question. They are called **rhetorical questions** because they don't require or expect an answer. Many should be written without question marks.

Examples: *Why don't you take a break.*

Would you kids knock it off.

What wouldn't I do for you!

Rule 4. Use a question mark when a sentence is half statement and half question.

Example: *You do care, don't you?*

Rule 5. The placement of question marks with quotation marks follows logic. If a question is within the quoted material, a question mark should be placed inside the quotation marks.

Examples: *She asked, "Will you still be my friend?"*

The question is part of the quotation.

Do you agree with the saying, "All's fair in love and war"?

The question is outside the quotation.

EXCLAMATION POINTS

Rule 1. Use an exclamation point to show emotion, emphasis, or surprise.

Examples: *I'm truly shocked by your behavior!*

Yay! We won!

Rule 2. An exclamation point replaces a period at the end of a sentence.

Incorrect: *I'm truly shocked by your behavior!.*

Rule 3. Do not use an exclamation point in formal business writing.

Rule 4. Overuse of exclamation points is a sign of undisciplined writing. Do not use even one of these marks unless you're convinced it is justified.

CHAPTER 3

CAPITALIZATION

Capitalization is the writing of a word with its first letter in uppercase and the remaining letters in lowercase. Experienced writers are stingy with capitals. It is best not to use them if there is any doubt.

Rule 1. Capitalize the first word of a document and the first word after a period.

Rule 2. Capitalize proper nouns—and adjectives derived from proper nouns.

Examples: *the Golden Gate Bridge*
the Grand Canyon
a Russian song
a Shakespearean sonnet
a Freudian slip

With the passage of time, some words originally derived from proper nouns have taken on a life, and authority, of their own and no longer require capitalization.

Examples: *herculean* (from the ancient-Greek hero Hercules)
quixotic (from the hero of the classic novel *Don Quixote*)
draconian (from ancient-Athenian lawgiver Draco)

The main function of capitals is to focus attention on particular elements within any group of people, places, or things. We can speak of *a lake in the middle of the country*, or we can be more specific and say *Lake Michigan*, which distinguishes it from every other lake on earth.

Capitalization Reference List

- Brand names
- Companies
- Days of the week and months of the year
- Governmental matters

Congress (but congressional), the U.S. Constitution (but constitutional), the Electoral College, Department of Agriculture. **Note:** Many authorities do not capitalize federal or state unless it is part of the official title: *State Water Resources Control Board*, but *state water board*; *Federal Communications Commission*, but *federal regulations*.
- Historical episodes and eras

the Inquisition, the American Revolutionary War, the Great Depression
- Holidays
- Institutions

Oxford College, the Juilliard School of Music
- Manmade structures

the Empire State Building, the Eiffel Tower, the Titanic
- Manmade territories

Berlin, Montana, Cook County
- Natural and manmade landmarks

Mount Everest, the Hoover Dam
- Nicknames and epithets

Andrew “Old Hickory” Jackson; Babe Ruth, the Sultan of Swat
- Organizations

American Center for Law and Justice, Norwegian Ministry of the Environment
- Planets

Mercury, Venus, Mars, Jupiter, Saturn, Uranus, Neptune, but policies vary on capitalizing *earth*, and it is usually not capitalized unless it is being discussed specifically as a planet: *We learned that Earth travels through space at 66,700 miles per hour*.
- Races, nationalities, and tribes

Eskimo, Navajo, East Indian, Caucasian, African American (**Note:** *white* and *black* in reference to race are lowercase)
- Religions and names of deities

Note: Capitalize *the Bible* (but *biblical*). Do not capitalize *heaven, hell, the devil, satanic*.

- Special occasions
the Olympic Games, the Cannes Film Festival
- Streets and roads

Lowercase Reference List

Here is a list of categories *not* capitalized unless an item contains a proper noun or proper adjective (or, sometimes, a trademark). In such cases, only the proper noun or adjective is capitalized.

- Animals
antelope, black bear, Bengal tiger, yellow-bellied sapsucker, German shepherd
- Elements
Always lowercase, even when the name is derived from a proper noun: *einsteinium, nobelium, californium*
- Foods
Lowercase except for brand names, proper nouns and adjectives, or custom-named recipes: *Tabasco sauce, Russian dressing, pepper crusted bluefin tuna, Mandy's Bluefin Surprise*
- Heavenly bodies besides planets
Never capitalize the *moon* or the *sun*.
- Medical conditions
Epstein-Barr syndrome, tuberculosis, Parkinson's disease
- Minerals
- Plants, vegetables, and fruits
poinsettia, Douglas fir, Jerusalem artichoke, organic celery, Golden Delicious apples
- Seasons and seasonal data
spring, summertime, the winter solstice, the autumnal equinox, daylight saving time

Rule 3. A thorny aspect of capitalization: where does it stop? When does the *Iraq war* become the *Iraq War*? Why is the legendary *Hope Diamond* not the *Hope diamond*? Everyone writes *New York City*, so why does the *Associated Press Stylebook* recommend *New York state*? There aren't always easy formulas or logical explanations. Research with reference books and search engines is the best strategy.

In the case of brand names, companies are of little help, because they capitalize any word that applies to their merchandise. *Domino's Pizza* or *Domino's pizza*? Is it *Ivory Soap* or *Ivory soap*, a *Hilton Hotel* or a *Hilton hotel*? Most writers don't capitalize common nouns that simply describe the products (*pizza, soap, hotel*), but it's not always easy to determine where a brand

name ends. There is *Time* magazine but also the *New York Times Magazine*. No one would argue with *Coca-Cola* or *Pepsi Cola*, but a case could be made for *Royal Crown cola*.

If a trademark starts with a lowercase word or letter (e.g., *eBay*, *iPhone*), many authorities advise capitalizing it to begin a sentence.

Example: *eBay opened strong in trading today.*

Rule 4. Capitalize titles when they are used before names, unless the title is followed by a comma. Do not capitalize the title if it is used after a name or instead of a name.

Examples: *The president will address Congress.*

Chairman of the Board William Bly will preside at the conference.

The chairman of the board, William Bly, will preside.

The senators from Iowa and Ohio are expected to attend.

Also expected to attend are Senators Buzz James and Eddie Twain.

The governors, lieutenant governors, and attorneys general called for a special task force.

Governor Fortinbrass, Lieutenant Governor Poppins, and Attorney General Dalloway will attend.

NOTE

Out of respect, some writers and publishers choose to capitalize the highest ranks in government, royalty, religion, etc.

Examples: *The President arrived.*

The Queen spoke.

The Pope decreed.

Many American writers believe this to be a wrongheaded policy in a country where, theoretically, all humans are perceived as equal.

Rule 5. Titles are not the same as occupations. Do not capitalize occupations before full names.

Examples: *director Steven Spielberg*

owner Helen Smith

coach Biff Sykes

Sometimes the line between title and occupation gets blurred. One example is *general manager*: is it a title or an occupation? Opinions differ. Same with *professor*: the Associated Press

Stylebook considers *professor* a job description rather than a title, and recommends using lower-case even before the full name: *professor Robert Ames*.

Rule 6a. Capitalize a formal title when it is used as a direct address.

Example: *Will you take my temperature, Doctor?*

Rule 6b. Capitalize relatives' family names (kinship names) when they immediately precede a personal name, or when they are used alone in place of a personal name.

Examples: *I found out that Mom is here.*

You look good, Grandpa.

Andy and Opie loved Aunt Bee's apple pies.

However, these monikers are not capitalized with possessive nouns or pronouns, when they follow the personal name, or when they are not referencing a specific person.

Examples: *My mom is here.*

Joe's grandpa looks well.

The James brothers were notorious robbers.

There's not one mother I know who would allow that.

Rule 6c. Capitalize nicknames in all cases.

Examples: *Meet my brothers, Junior and Scooter.*

I just met two guys named Junior and Scooter.

Rule 7. Capitalize specific geographical regions. Do not capitalize points of the compass.

Examples: *We had three relatives visit from the West.*

Go west three blocks and then turn left.

We left Florida and drove north.

We live in the Southeast.

We live in the southeast section of town.

Most of the West Coast is rainy this time of year. (referring to the United States)

The west coast of Scotland is rainy this time of year.

Some areas have come to be capitalized for their fame or notoriety:

Examples: *I'm from New York's Upper West Side.*

I'm from the South Side of Chicago.

You live in Northern California; he lives in Southern California.

Rule 8. In general, do not capitalize the word *the* before proper nouns.

Examples: *I'm reading the London Times.*
They're fans of the Grateful Dead.

In special cases, if the word *the* is an inseparable part of something's official title, it may be capitalized.

Example: *We visited The Hague.*

Rule 9. Do not capitalize *city*, *town*, *county*, etc., if it comes before the proper name.

Examples: *the city of New York*
New York City
the county of Marin
Marin County

Rule 10. Always capitalize the first word in a complete quotation, even midsentence.

Example: *Bill said, "That job we started last April is done."*

Rule 11. For emphasis, writers sometimes capitalize a midsentence independent clause or question.

Examples: *One of her cardinal rules was, Never betray a friend.*
It made me wonder, What is mankind's destiny?

Rule 12. Capitalize the names of specific course titles, but not general academic subjects.

Examples: *I must take history and Algebra 101.*
He has a double major in European economics and philosophy.

Rule 13. Capitalize art movements.

Example: *I like Surrealism, but I never understood Abstract Expressionism.*

Rule 14. Do not capitalize the first item in a list that follows a colon.

Example: *Bring the following: paper, a pencil, and a snack.*

For more on capitalization after a colon, go to "Colons," Rules 1, 3, and 4, in Chapter Two.

Rule 15. Do not capitalize "*the national anthem*."

Rule 16a. Composition titles: which words should be capitalized in titles of books, plays, films, songs, poems, essays, chapters, etc.? This is a vexing matter, and policies vary. The usual advice is to capitalize only the "important" words. But this isn't really very helpful. Aren't all words in a title important?

The following rules for capitalizing composition titles are universal.

- Capitalize the title's first and last word.
- Capitalize verbs, including all forms of the verb *to be* (*is, are, was*, etc.).
- Capitalize all pronouns, including *it, he, who, that*, etc.
- Capitalize *not*.
- Do not capitalize *a, an*, or *the* unless it is first or last in the title.
- Do not capitalize the word *and, or*, or *nor* unless it is first or last in the title.
- Do not capitalize the word *to*, with or without an infinitive, unless it is first or last in the title.

Otherwise, styles, methods, and opinions vary. Small words such as *or, as, if*, and *but* are capped by some, but lowercased by others.

The major bone of contention is prepositions. The *Associated Press Stylebook* recommends capitalizing all prepositions of more than three letters (e.g., *With, About, Across*). Others advise lowercase until a preposition reaches five or more letters. Still others say not to capitalize any preposition, even big words like *regarding* or *underneath*.

Hyphenated words in a title also present problems. There are no set rules. Some writers, editors, and publishers choose not to capitalize words following hyphens unless they are proper nouns or proper adjectives (*Ex-Marine* but *Ex-husband*). Others capitalize any word that would otherwise be capped in titles (*Prize-Winning, Up-to-Date*).

Rule. 16b. Many books have subtitles. When including these, put a colon after the work's title and follow the same rules of composition capitalization for the subtitle.

Example: *The King's English: A Guide to Modern Usage*

Note that *A* is capitalized because it is the first word of the subtitle.

Suppose you are reviewing a book whose title on the cover is in capital letters: *THE STUFF OF THOUGHT*. Beneath, in smaller capital letters, is the subtitle, *LANGUAGE AS A WINDOW INTO HUMAN NATURE*. All sides would agree that the main title should be written, *The Stuff of Thought*. But depending on which capitalization policy you choose, the subtitle might be any of the following:

Language As a Window Into Human Nature

Capitalizing composition titles is fraught with gray areas. Pick a policy and be consistent.

CHAPTER 4

WRITING NUMBERS

Except for a few basic rules, spelling out numbers vs. using figures (also called numerals) is largely a matter of writers' preference. Again, consistency is the key.

Policies and philosophies vary from medium to medium. The two most influential guidebooks for publishers, editors, and writers, the *Associated Press Stylebook* and the *Chicago Manual of Style*, have different approaches. The first recommends spelling out the numbers one through nine and using figures thereafter; *Chicago* recommends spelling out the numbers one through ninety-nine and using figures thereafter.

This is a complex topic, with many exceptions, and there is no consistency we can rely on among blogs, books, newspapers, and magazines. This chapter will confine itself to rules that all media seem to agree on.

Rule 1. Spell out all numbers beginning a sentence.

Examples: Twenty-three hundred sixty-one victims were hospitalized.
Nineteen fifty-six was quite a year.

Note: The *Associated Press Stylebook* makes an exception for years.

Example: 1956 was quite a year.

Rule 2a. Hyphenate all compound numbers from twenty-one through ninety-nine.

Examples: *Forty-three people were injured in the train wreck.
Twenty-seven of them were hospitalized.*

Rule 2b. Hyphenate all written-out fractions.

Examples: *We recovered about two-thirds of the stolen cash.
One-half is slightly less than five-eighths.*

Rule 3a. With figures of four or more digits, use commas. Count three spaces to the left to place the first comma. Continue placing commas after every three digits. *Important:* do not include decimal points when doing the counting.

Examples: *1,054 people
\$2,417,592.21*

Rule 3b. It is not necessary to use a decimal point or a dollar sign when writing out sums of less than a dollar.

Not advised: *He had only \$0.60.*
Better: *He had only sixty cents.*
OR
He had only 60 cents.

Rule 4a. For clarity, use *noon* and *midnight* rather than *12:00 PM* and *12:00 AM*.

NOTE

AM and *PM* are also written *A.M.* and *P.M.*, *a.m.* and *p.m.*, and *am* and *pm*. Some put a space between the time and *AM* or *PM*.

Examples: *8 AM
3:09 P.M.
11:20 p.m.*

Others write times using no space before *AM* or *PM*.

Examples: *8AM
3:09P.M.
11:20p.m.*

For the top of the hour, some write *9:00 PM*, whereas others drop the *:00* and write *9 PM* (or *9 p.m.*, *9PM*, etc.).

Rule 4b. Using numerals for the time of day has become widely accepted.

Examples: *The flight leaves at 6:22 a.m.
Please arrive by 12:30 sharp.*

However, some writers prefer to spell out the time, particularly when using *o'clock*.

Examples: *She takes the four thirty-five train.
The baby wakes up at five o'clock in the morning.*

Rule 5. Mixed fractions are often expressed in figures unless they begin a sentence.

Examples: *We expect a $5\frac{1}{2}$ percent wage increase.
Five and one-half percent was the expected wage increase.*

Rule 6. The simplest way to express large numbers is usually best.

Example: *twenty-three hundred* (simpler than *two thousand three hundred*)

Large round numbers are often spelled out, but be consistent within a sentence.

Consistent: *You can earn from one million to five million dollars.*

Inconsistent: *You can earn from one million dollars to 5 million dollars.*

Inconsistent: *You can earn from \$1 million to five million dollars.*

Rule 7. Write decimals using figures. As a courtesy to readers, many writers put a zero in front of the decimal point.

Examples: *The plant grew 0.79 inches last year.
The plant grew only 0.07 inches this year.*

Rule 8. When writing out a number of three or more digits, the word *and* is not necessary. However, use the word *and* to express any decimal points that may accompany these numbers.

Examples: *one thousand one hundred fifty-four dollars
one thousand one hundred fifty-four dollars and sixty-one cents*
Simpler: *eleven hundred fifty-four dollars and sixty-one cents*

Rule 9. The following examples are typical when using figures to express dates.

Examples: *the 30th of June, 1934
June 30, 1934* (no *-th* necessary)

Rule 10. When spelling out decades, do not capitalize them.

Example: *During the eighties and nineties, the U.S. economy grew.*

Rule 11. When expressing decades using figures, it is simpler to put an apostrophe before the incomplete numeral and no apostrophe between the number and the s.

Example: *During the '80s and '90s, the U.S. economy grew.*

Some writers place an apostrophe after the number:

Example: *During the 80's and 90's, the U.S. economy grew.*

Awkward: *During the '80's and '90's, the U.S. economy grew.*

Rule 12. You may also express decades in complete numerals. Again, it is cleaner to avoid an apostrophe between the year and the s.

Example: *During the 1980s and 1990s, the U.S. economy grew.*

CHAPTER 5

CONFUSING WORDS AND HOMONYMS

Many words in English sound or look alike, causing confusion and not a few headaches. This chapter lists some of these words, and other troublemakers.

A

A, AN

Use *a* when the first letter of the word following has the sound of a consonant. Keep in mind that some vowels can sound like consonants, such as when they're sounded out as individual letters. Also, some letters, notably *h* and *u*, sometimes act as consonants (*home, usual*), other times as vowels (*honest, unusual*).

Examples:

- a yearning*
- a hotel*
- a U-turn* (pronounced “yoo”)
- a NASA study*

Use *an* when the first letter of the word following has the sound of a vowel.

- Examples:**
- an unfair charge*
 - an honor* (the *h* is silent)
 - an HMO plan* (*H* is pronounced “atch”)
 - an NAACP convention* (the *N* is pronounced “en”)

ABBREVIATION, ACRONYM

This is a fine distinction that some consider nitpicking. Terms such as *FBI*, *HMO*, and *NAACP*, although widely called acronyms, are actually abbreviations. The difference is in how they are spoken. An *abbreviation*, also called an *initialism*, is pronounced letter by letter. An *acronym* is pronounced as if it were a word. The abbreviation *FBI* is pronounced “eff-bee-eye.” The acronym *NASA* is pronounced “nassa.”

ACCEPT, EXCEPT

Accept means “to acknowledge” or “to agree to.”

Except is usually a preposition used to specify what isn’t included: *I like all fruits except apples.*

ACRONYM

See **abbreviation, acronym**.

AD, ADD

Ad: short for “advertisement.”

Add: to include; to perform addition.

ADAPT, ADOPT

To *adapt* is to take something and change it for a special purpose. A screenwriter adapts a book to make it work as a movie. An organism adapts (itself) to a new environment.

To *adopt* is to take something and use it or make it your own. A government adopts a different policy. A family adopts an orphan.

ADVERSE, AVERSE

Adverse: unfavorable: *an adverse reaction to the medication*.

Averse: not fond of; seeking to avoid: *averse to risk*.

ADVICE, ADVISE

Advice: guidance.

Advise: to suggest; to recommend.

AFFECT, EFFECT

Affect as a verb means “to influence”: *It affected me strangely*. As a noun, it is a technical term used in psychology to describe someone’s emotional state.

Effect as a noun means “result”: *It had a strange effect on me*. As a verb, it means “to bring about” or “to cause”: *He’s trying to effect change in government*.

AGGRAVATE

This word is not a synonym for *annoy* or *irritate*. To *aggravate* is to make something worse: *He started running too soon and aggravated his sprained ankle*.

AHOLD

You can get *hold* of something, and you can get *a hold* of it. But in formal writing, “ahold” is not a real word.

AID, AIDE

An *aid* is a thing that helps.

An *aide* is a living helper or assistant: *His aide brought first aid*.

AIL, ALE

Ail: to be ill.

Ale: an alcoholic beverage.

AISLE, ISLE

Aisle: a corridor.

Isle: an island.

ALL READY, ALREADY

All ready means that everything or everyone is now ready.

Already refers to something accomplished earlier: *We already ate*.

ALL RIGHT

Two words. Someday, *alright* may finally prevail, but it hasn’t yet.

ALL-TIME RECORD

The team set an *all-time record* for consecutive games won. Delete *all-time*. All records are “all-time” records.

Similarly, avoid “new record.” The team set a record, not a new record.

ALL TOGETHER, ALTOGETHER

All together: in a group: *We're all together in this.*

Altogether: entirely: *It is not altogether his fault.*

ALLUDE, ELUDE, REFER

Allude means “to mention indirectly.” Do not confuse *allude* with *refer*. If we say, “Good old Joe is here,” we *refer* to Joe. If we say, “That man with the ready laugh is here,” we *allude* to Joe, but we never mention his name.

Allude is also sometimes confused with *elude*, which means “to escape” or “avoid capture.”

ALLUSION, ILLUSION

Allusion, the noun form of *allude*, is an indirect, sometimes sly, way of talking about something or someone.

An *illusion* is a false perception.

ALLOWED, ALOUD

Allowed: permitted.

Aloud: said out loud.

ALTAR, ALTER

Altar: a pedestal, usually religious.

Alter: to modify; to change.

AMBIGUOUS, AMBIVALENT

Something is *ambiguous* if it is unclear or has more than one meaning.

Ambivalent describes a mixed or undecided state of mind: *Her ambiguous remark left him feeling ambivalent about her.*

AMIABLE, AMICABLE

Both words mean “friendly,” but *amiable* generally describes a pleasant person; *amicable* generally describes a cordial situation: *The amiable couple had an amicable divorce.*

AMID, AMIDST

Either is acceptable, but many writers prefer the more concise *amid*.

AMOUNT, NUMBER

Use *amount* for things that cannot be counted and *number* for things that can be counted: *This amount of water is enough to fill a number of bottles.*

The culprit is *amount*. Some might incorrectly say “a large amount of bottles,” but no one would say “a large number of water.”

a.m., p.m.

The abbreviation *a.m.* refers to the hours from midnight to noon, and *p.m.* refers to the hours from noon to midnight. Careful writers avoid such redundancies as *three a.m. in the morning* (delete *in the morning*) or *eight p.m. this evening* (make it *eight o'clock this evening*).

To avoid confusion, use *midnight* instead of *twelve a.m.* and *noon* instead of *twelve p.m.*

The terms also are frequently written as *A.M., P.M.; AM, PM;* and *am, pm.*

AN

See **a**, **an**.

AND/OR

“Objectionable to many, who regard it as a legalism,” says Roy H. Copperud in *A Dictionary of Usage and Style*. Either say *and* or say *or*.

ANECDOSE, ANTIDOTE

An *anecdote* is a brief, amusing tale.

An *antidote* counteracts or reduces the effects of something unpleasant or even lethal. There are antidotes for snakebites, but there is no known antidote for boring anecdotes.

AN HISTORIC

Some speakers and writers use *an* with certain words starting with an audible *h*—the word *historic* heads the list. But why do those who say *an historic occasion* say *a hotel, a hospital, a happy*

home? There is no valid reason to ever say *an historic*, *an heroic*, *an horrific*, etc., and anyone who does so is flirting with pomposity.

ANXIOUS, EAGER

In casual usage, *anxious* has become a synonym for *eager*, but the words are different. Whereas *eager* means “excited” or “enthusiastic,” *anxious*, like *anxiety*, denotes uneasiness.

ANY MORE, ANYMORE

Use the two-word form to mean “any additional”: *I don’t need any more help*.

Use *anymore* to mean “any longer”: *I don’t need help anymore*.

ANY TIME, ANYTIME

Traditionalists do not accept the one-word form, *anytime*. But it is everywhere, and there’s no turning back.

There does seem to be a difference between *You may call anytime* and *Do you have any time?* Always use the two-word form with a preposition: *You may call at any time*.

APPRAISE, APPRISE

A school district official was quoted as saying, “We have been appraised of all the relevant issues.” Bad choice. The word *appraise* means “to decide the value of.” The gentleman clearly meant *apprised*, which means “informed.”

ASCENT, ASSENT

Ascent: a climb; movement upward.

Assent: an agreement (noun); to agree (verb).

AS REGARDS

See **in regard(s) to, with regard(s) to**.

ASSUME, PRESUME

Assume: to take for granted without evidence.

Presume: to believe based on evidence.

ASSURE, ENSURE, INSURE

To *assure* is to promise or say with confidence. It is more about saying than doing: *I assure you that you’ll be warm enough*.

To *ensure* is to do or have what is necessary for success: *These blankets ensure that you'll be warm enough.*

To *insure* is to cover with an insurance policy.

What you *insure* you entrust to a business. What you *ensure* results from your personal efforts.

AURAL, ORAL

Since the two words are pronounced the same, be careful not to write *oral* (having to do with the mouth) if you mean *aural* (having to do with hearing).

AVERSE

See **adverse**, **averse**.

A WHILE, AWHILE

The two-word phrase *a while* is getting pushed aside by *awhile*. But *awhile* should only be used to mean “for a while.” It’s a distinction worth preserving: *It took a while, but I was convinced after thinking it over awhile.*

Always use *a while* with prepositions: *After a while, she arrived.*

B

BACKWARD, BACKWARDS

Both forms are acceptable, although the *Associated Press Stylebook* instructs journalists to always use *backward*.

BACTERIA

Staphylococcus is a virulent form of *bacteria*. No problem there. But in a sentence like *It's a virulent bacteria*, well, now we have a problem. *Bacteria* is a plural noun; the singular is *bacterium*. So don’t write *The bacteria in the cut was infecting it*, because the *bacteria* were infecting it.

BAIL, BALE

Both words do double duty as noun and verb. As a noun, *bail* commonly refers to money deposited to gain a prisoner’s freedom, or *bail* that prisoner *out*.

A *bale* is a large, bound or wrapped package of unprocessed material. To *bale* is to make into a bale.

BAITED BREATH, BATED BREATH

Don't write "baited breath." The word *bated*, a variant of *abated*, means "lessened in intensity," "restrained."

BALL, BAWL

Ball: a round object; a gala event.

Bawl: to cry; howl.

BARE, BEAR

Bare as an adjective means "unconcealed": *bare arms*. As a verb it means "expose": *to bare one's feelings*.

Bear as a noun refers to a wild animal. As a verb it has many meanings, from "carry" (*bear arms*) to "tolerate" (*I can't bear it*) to "steer" (*bear right at the corner*).

BASICALLY

This word, especially when it starts a sentence, is probably unnecessary.

BEACH, BEECH

The *beech* tree was close to the windy *beach*.

BEAT, BEET

You can't *beat* my recipe for *beets*.

BECAUSE, SINCE

Because and *since* can be used just about interchangeably to explain the reason for something. But *since* can also refer to a time in the past: *I have waited since yesterday*.

BELL, BELLE

Bell: a chime or alarm.

Belle: a lovely woman.

BENIGHTED

He was a benighted soul in an enlightened time. Many people associate it with *knighted* and think *benighted* is a good thing to be. Far from it. Note the lack of a *k*; don't think *knight*, think *night*. To be *benighted* is to be "in a state of moral or intellectual darkness."

BERTH, BIRTH

Berth: a built-in bed on a train or boat; a space for a boat to dock.

Birth: being born; a beginning.

BESIDE, BESIDES

Besides as an adverb means “in addition” or “moreover”: *It’s Albert’s birthday, and besides, you promised.* *Besides* is also a preposition meaning “other than” or “except”: *Who besides me is hungry?*

Compare that with *The person beside me is hungry.* *Beside* is a preposition that means “next to,” “near,” “alongside.”

A lot of people say something is “besides the point.” They mean *beside* the point. When a statement is beside the point, it misses the mark and settles nothing.

BETTER, BETTOR

Better: of higher quality.

Bettor: a gambler.

BIANNUAL, BIENNIAL, SEMIANNUAL

These words do not all mean the same thing. *Biannual* means “twice a year,” as does *semi-annual*, whereas *biennial* means “occurring every two years.”

BITE, BYTE

Don’t confuse what your teeth do with *byte*, a computer term for eight bits of information. Adding to the confusion, *sound bite*—a brief excerpt from a longer work—is sometimes mistakenly written “sound byte.”

BLOC, BLOCK

The more familiar word is *block*, which can refer to many things: a toy, a cube-shaped object, a city street. Not as versatile is *bloc*: a group united for a particular purpose.

BOAR, BOOR, BORE

Boar: a wild pig.

Boor: a vulgar brute.

Bore: a compulsive chatterbox.

BOARD, BORED

When the *board* called the roll, he was too *bored* to speak up.

BOLDER, BOULDER

Bolder: more daring.

Boulder: a large rock.

BORN, BORNE

To be *born* is to be given birth to, as babies are born. Or it can mean “to be created”: ideas are born the moment we think of them. It also means “to arise from”: *Timmy’s stomachache was born of wolfing his food*.

Borne is the past tense of *bear*, in the sense of “carry.” To be *borne* is to be carried: *a mosquito-borne disease*; or to be endured: *Timmy’s stomachache had to be borne until it finally went away*.

BOY, BUOY

Few if any would write *boy* instead of *buoy*, a nautical beacon or marker. Nonetheless, both words are traditionally pronounced the same. In *Bryson’s Dictionary of Troublesome Words*, author Bill Bryson says, “Unless you would say ‘boo-ee-ant’ for *buoyant*, please return to pronouncing it ‘boy.’”

BRAKE, BREAK

Use your *brake* before you *break* something.

BRIDAL, BRIDLE

Bridal: relating to brides and weddings.

A *bridle* is a head harness, usually for a horse. Not surprisingly, the verb *bridle* means “to control” or “to restrain.” But it also means “to pull back the head quickly in anger.”

BRING, TAKE

They’re not interchangeable. You *bring* something here; you *take* something there. The locations of “here” and “there” are from the perspective of the speaker or writer. Your friend asks you to *bring* her a book, so you *take* the book to her home.

BROACH, BROOCH

To *broach* a topic is to bring it up for discussion: *Now is the time to broach the subject*. As a verb, *broach* also means “to open or enlarge a hole.” The noun *broach* refers to a pointed tool which performs that operation.

A *brooch*, a decorative pin or clip, is nothing like a *broach*. But since they're often pronounced alike, and because ignorance never rests, some dictionaries accept *broach* as an alternative spelling of *brooch*.

BUOY

See **boy, buoy**.

BYTE

See **bite, byte**.

C

CACHE, CASH

As a noun, *cache* refers to a hidden supply of valuables, such as food, jewels, and *cash*. But it can also refer to the hiding place where you keep those items. The verb *cache* means “to hide treasure in a secret place”: *He cached all his cash in a cache*.

CAN, MAY

I can go means I have the ability and freedom to go.

I may go means I have either an option or permission to go.

CANNON, CANON

Cannon: a large, mounted gun.

Canon: a body of writings; a principle or set of principles.

CANNOT

One word; avoid “can not.”

CANVAS, CANVASS

Canvas is a durable fabric.

Canvass as a noun or a verb refers to the door-to-door gathering of votes or opinions.

CAPITAL, CAPITOL

Just remember: the *o* means it's a building. A *capitol* is a government building where a state legislature meets, and the *Capitol* is the building where the U.S. Congress meets.

A *capital* is a city that serves as the seat of government. *We got a tour of the capitol when we went to the capital.*

CARAT, CARET, KARAT

Most of the confusion is caused by *carat* and *karat* because both are associated with jewelry. The purity of gold is measured in *karats*. *Twenty-four-karat gold is 99.9 percent pure, but so soft that it is considered impractical for most jewelry.*

A *carat* is a weight measurement for gemstones: *a two-carat diamond set in an eighteen-karat gold ring.*

A *caret* has nothing to do with any of this. It is a mark an editor makes in a document to show where additional material should be inserted.

CAREEN, CAREER

Grammar sticklers are a stubborn lot. They use *career* the way everyone else uses *careen*. It is *career*, not *careen*, that means “to veer out of control”: *The car careered wildly across three lanes.* *Careen* means “to lean or tip over,” and strictly speaking, it’s more suitable for describing boats than cars.

CAST, CASTE

Cast: a group of actors or individuals.

Caste: a social class; a rigid system of social distinctions.

CEMENT, CONCRETE

People constantly refer to “cement” sidewalks, driveways, walls, etc. However, *cement* is a powder that, when mixed with sand or gravel and water, becomes *concrete*.

CENSOR, CENSURE

They sound similar, and both words deal with negative criticism. *Censor* as a verb means “to remove unacceptable material.” As a noun, it means “someone who censors.”

Censure as a verb means “to disapprove of” or “to criticize strongly.” As a noun, it means “disapproval,” even “scorn.”

CENTER AROUND

The lecture will center around the economy. The center is the middle point. Would you say “point around”? This common, muddleheaded expression results from scrambling *center on* and

revolve around. Because those idioms are roughly synonymous, if you use them both enough, they merge in the mind.

CEREAL, SERIAL

Cereal: a breakfast food.

Serial: a story told in regular installments (noun); ongoing, in a series (adjectives).

CHAISE LOUNGE

This example of cultural dyslexia should be avoided at all costs. The correct term is *chaise longue*, meaning “long chair” in French.

CHILDISH, CHILDLIKE

Both are comparisons with children. The difference is that *childish* is unflattering; it’s equivalent to *infantile* and only a small improvement on *babyish*. Someone is *childish* when acting unreasonable or bratty.

Not so with *childlike*, a word that extols youthful virtues, such as sweetness, purity, and innocence.

CHILE, CHILI

If life were fair, *Chile* with an *e* would refer only to a country in South America, and *chili* with a second *i* would refer to a type of pepper, and also to a spicy stew. These spellings are recommended, but with the caveat that not everyone agrees. In New Mexico, the stew they eat is *chile*, not *chili*. The stylebook of the *Los Angeles Times* says the dish is *chili*, but the pepper is a *chile*. And there are even some who spell the pepper or the dish *chilli*.

CHOMPING AT THE BIT

It started out as *champing at the bit*, which is still preferred by most dictionaries.

CHORAL, CORAL

Choral: relating to or sung by a choir.

Coral: an underwater organism that makes up reefs; a shade of orange.

CHORALE, CORRAL

A *chorale* can be both a piece of music and a singing group.

A *corral* is an enclosure for horses or other livestock.

CHORD, CORD

When two or more musical tones are sounded simultaneously, the result is a *chord*.

A *cord* is a rope or strand of flexible material.

CITE, SIGHT, SITE

Cite: to quote; to praise; to mention; to order to appear in court.

Sight: the ability to see; a scene or view.

Site: a location or position.

CLASSIC, CLASSICAL

Classic, adjective or noun, is a term of high praise: “of the finest quality” or “a prime example of”: *a classic play, a classic pizza*.

The adjective *classical* applies to traditions going back to the ancient Greeks and Romans: *The house featured an array of classical influences*.

Classical music is marked by formal, sophisticated, extended compositions.

CLICHÉ

It's a noun, not an adjective. Yet more and more you see or hear things like *I know it sounds cliché, but...* Make it *I know it sounds like a cliché*.

CLICK, CLIQUE

A *click* is a brief percussive noise, but some mistakenly write it when they mean *clique*, a close, exclusive group of people.

CLIMACTIC, CLIMATIC

Climactic—note that middle *c*—means “exciting” or “decisive.” It is often confused with *climatic*, which means “resulting from or influenced by climate.”

CLOSE PROXIMITY

This phrase is a pompous and redundant way of saying “near.” *Proximity* does not mean “distance”; it means “nearness,” so *close proximity* means “close nearness.”

COARSE, COURSE

Coarse means “rough, lacking in fineness of texture” or “crude, lacking in sensitivity.”

Course is usually a noun and has several meanings, mostly having to do with movement or progress, whether it be a *course* taken in school or the *course* of a river.

COHORT

Your friend is a crony, confidant, or collaborator, but not a cohort. In ancient Rome, a *cohort* was a division of three hundred to six hundred soldiers. So careful speakers and writers avoid *cohort* when referring to one person. Your *cohort* is not your comrade, ally, teammate, or assistant. It's a whole group, gang, team, posse: *A cohort of laborers went on strike.*

COIN A PHRASE

To *coin a phrase* is to make one up. But many misuse it when citing or quoting familiar expressions: *His bright idea was, to coin a phrase, dead on arrival.* Since *dead on arrival* is a well-known idiom, the writer didn't "coin" it; he merely repeated it.

COINCIDENCE

See **irony**.

COLLECTABLE, COLLECTIBLE

Both are acceptable, but *collectible* has a slight edge in popularity, especially as a noun.

COLLIDE, CRASH

A *collision* involves two moving objects. A car does not *collide* with a lamppost; it *crashes* into a lamppost.

COMPLEMENT, COMPLIMENT

As both noun and verb, *complement* refers to an added element that enhances, rounds out, or puts a final touch on something.

Compliment, noun and verb, is about nice words or gestures. *Try this perfect complement to your order, with our compliments.*

COMPLETE, COMPLETELY

These words are often unnecessary. What is the difference between *a complete meltdown* and *a meltdown*? How is *completely exhausted* different from *exhausted*?

COMPRISE

Possibly the most abused two-syllable word in English. It means "contain," "consist of," "be composed of." Most problems could be avoided by remembering this mantra: *The whole comprises its parts.*

Consider this misuse: *Vegetables comprise 80 percent of my diet.* The correct sentence is *Eighty percent of my diet comprises vegetables.* My diet *consists of* vegetables; vegetables do not consist of my diet.

This sentence looks right to most people: *Joe, John, and Bob comprise the committee.* But it's the other way around: *The committee comprises Joe, John, and Bob.*

Another common misuse is the phrase *comprised of*, which is never correct. Most people use *comprised of* as an elegant-seeming alternative to *composed of*. An ad for a cleaning service states, "Our team is comprised of skilled housekeepers." Make it "Our team comprises skilled housekeepers," "Our team is composed of skilled housekeepers," or, perhaps the best choice, "Our team consists of skilled housekeepers."

Since *comprise* already means "composed of," anyone using *comprised of* is actually saying "composed of of."

CONCERTED

One person cannot make a *concerted* effort. A concert implies an orchestra. As Paul Brians points out in his *Common Errors in English Usage*, "To work 'in concert' is to work together with others. One can, however, make a *concentrated* effort."

CONCRETE

See **cement, concrete**.

CONFIDANT, CONFIDENT

Confidant: a trusted adviser.

Confident: certain, self-assured.

CONNIVE, CONSPIRE

One who *connives* pretends not to know while others are collaborating on something sneaky, wrong, or illegal.

To *conspire* is to work together on a secret scheme.

CONNOTE, DENOTE

Denote is used for descriptions that stick to the facts. The word "dog" *denotes* a domesticated animal.

Connote reveals additional meanings beyond what is clinical or objective. It is used when expressing what a word implies or reminds us of. The word "dog" *connotes* loyalty.

CONTINUAL, CONTINUOUS

The difference between *continual* and *continuous* is the subtle difference between *regular* and *nonstop*. If your car *continually* breaks down, it also runs some of the time.

A faucet that drips *continuously* never stops dripping, twenty-four hours a day. If a faucet drips *continually*, there are interludes when it's not dripping.

CONVINCE, PERSUADE

To many, these two are synonyms, but there are shades of difference. Someone might be persuaded, while at the same time, not convinced: *She persuaded me to do it, but I'm still not convinced it was right*. When something or someone *persuades* us to act, it might be by using reason or logic, but it could also be by using force, lies, or guilt.

Convince refers to an unforced change of mind and heart that precedes action. We consider the evidence, and if it is strong enough, it *convinces* us and changes our perspective.

In formal writing, *convince* never takes an infinitive, but *persuade* almost always does. You cannot be convinced *to do* something; you can only be convinced *that* something, or be convinced *of* something.

CORAL

See *choral, coral*.

CORD

See *chord, cord*.

CORRAL

See *chorale, corral*.

COUNCIL, COUNSEL

Council: a group of people meeting for a purpose.

Counsel: advice (noun); an attorney (noun); to give advice or guidance (verb).

COUPLE (OF)

The *of* stays. These days, even veteran communicators are saying and writing “couple miles from here” or “costs a couple bucks.” That used to be the jargon of tough guys in gangster movies.

COURSE

See **coarse**, **course**.

CRASH

See **collide**, **crash**.

RAVEN

To many people, a *craven scoundrel* is a flagrant or shameless rogue, not a spineless one. But *craven* means “cowardly,” “weak.”

CRITERIA

Criteria is the plural of *criterion*, a standard used for judging, deciding, or acting. The sentence *Honesty is our chief criteria* is ungrammatical; there can't be only one *criterion*. Make it *Honesty is our chief criterion* or *Honesty is one of our chief criteria*. Your criteria *are* your standards, plural.

Those who know that *criteria* is plural aren't out of the woods yet either: many believe the singular is “criterium.” And there are some who will reveal to you their “criterias.”

CURRENTLY

Often unnecessary. What is the difference between *I'm currently writing a book* and *I'm writing a book*?

D

DAILY BASIS

I run five miles on a daily basis. In most cases, the windy and unwieldy *on a daily basis* can be replaced with *daily* or *every day*.

DATA

John B. Bremner, in *Words on Words*, states unequivocally, “The word is plural.” This one is thorny, because the singular, *datum*, is virtually nonexistent in English. Many people see *data* as a synonym for “information,” and to them, *These data are very interesting* sounds downright bizarre. Maybe, but it's also correct. Theodore M. Bernstein, in *The Careful Writer*, says, “Some respected and learned writers have used *data* as a singular. But a great many more have not.”

DEFINITE, DEFINITIVE

Something *definite* is exact, clearly defined, with no ambiguity. But *definite* does not necessarily mean “correct”: *George has a definite belief that two and two are five.*

Something *definitive* is authoritative, the best, the last word: *This is the definitive biography of Lincoln.*

DENOTE

See **connote, denote**.

DESERT, DESSERT

The noun *desert* refers to a desolate area. As a verb, it means “to abandon.”

A *dessert* is the final course of a meal.

Many misspell the phrase *just deserts*, meaning “proper punishment.” In that usage, *deserts* is derived from *deserve*.

DESPISE

“Syme despised him and slightly disliked him,” wrote George Orwell in the novel *1984*. Orwell knew that, strictly speaking, *despise* means “to look down on” but not necessarily “to dislike,” although that’s usually part of the deal.

DEVICE, DEVISE

Device: an invention.

Devise: to invent.

DIFFERENT FROM, DIFFERENT THAN

Different from is the standard phrase. Traditionalists obstinately avoid *different than*, especially in simple comparisons, such as *You are different from me.*

More-liberal linguists point out that a sentence like *It is no different for men than it is for women* is clear and concise, and rewriting it with *different from* could result in a clumsy clunker like *It is no different for men from the way it is for women.*

They may have a point, but many fine writers have had no problem steering clear of *different than* for their entire careers.

DILEMMA

Be careful when using *dilemma* as a synonym for *predicament*. The *di-* in *dilemma* (like that in *dichotomy* or *dioxide*) indicates *two*: if you have a dilemma, it means you’re facing two tough choices.

DISBURSE, DISPERSE

To *disburse* is to distribute or pay out money or other financial assets.

Use *disperse* when something other than money is being distributed: *The agency dispersed pamphlets after the meeting.*

Disperse also means “to scatter” or “make disappear”: *The police dispersed the unruly mob.*

DISCOMFIT, DISCOMFORT

The two are often confused. *Discomfort* originally meant “to defeat utterly.” It has come to mean “to fluster,” “to embarrass.”

Discomfort is usually used as a noun meaning “anxiety,” “nervousness.”

DISCREET, DISCRETE

Discreet: careful not to attract attention, tactful.

Discrete: separate, detached.

People often write *discrete* when they mean *discreet*. The situation is not helped by *discretion*, the noun form of *discreet*.

DISINTERESTED, UNINTERESTED

You can be both uninterested and disinterested, or one but not the other. *Disinterested* means “impartial”; *uninterested* means “unconcerned” or “apathetic.”

Many would interpret *The judge was disinterested* to mean that the judge didn’t care. But the sentence actually means that the judge was unbiased. Huge difference there. Would you rather have a judge who’s fair or one who wants to go home?

DOCK

What is often thought of as a *dock* is actually a *pier* or *wharf*. The book *Modern American Usage* (edited by Jacques Barzun, et al.) defines a *dock* as “the water-filled space in which the ship comes to rest. The *pier* is the structure on which the passengers stand or alight.” Would Otis Redding’s song still be a masterpiece if he’d called it *Sittin’ on the Pier of the Bay*?

DRUG (DRAGGED)

She drug Joe out of his office at midnight. When did “drug” replace *dragged* as the past tense of *drag*? The answer is: It didn’t, and it couldn’t, and it better not.

DUAL, DUEL

Dual: double; having two parts.

Duel: a two-sided conflict (noun); to fight a duel (verb).

E**EAGER**

See **anxious, eager**.

EFFECT

See **affect, effect**.

e.g., i.e.

These two helpful abbreviations are often used interchangeably, a sorry mistake that impoverishes the language. The term *i.e.* means “that is to say” or “in other words,” whereas *e.g.* means “for example.”

To illustrate: *Artists like Marlon Brando and James Dean (i.e., the so-called “method actors”) electrified audiences in the 1950s.* Compare that sentence with *The so-called “method actors” (e.g., Marlon Brando and James Dean) electrified audiences in the 1950s.*

EKE OUT

It has come to mean “barely get by”: *I eke out a living as a writer.* But its traditional meaning is either “to supplement”: *I eke out my living as a writer by working a day job,* or “to make the most of”: *We eked out the small amount of food we had left.*

ELUDE

See **allude, elude, refer**.

EMIGRATE, IMMIGRATE

Emigrate: to leave one country in order to live in another country. *Emigrate* takes the preposition *from*, as in *He emigrated from Russia to America.* It is incorrect to say, “*He emigrated to America.*”

Immigrate: to enter a new country with the intention of living there. *Immigrate* takes the preposition *to*, as in *He immigrated to America from Russia.* It is incorrect to say, “*He immigrated from Russia.*”

EMINENT, IMMINENT

Eminent: prominent; distinguished: *an eminent scholar.*

Imminent: about to happen: *in imminent danger.*

EMPATHY, SYMPATHY

When we have *empathy*, we are able to put ourselves in other people's place and even feel their pain, or think we do.

Sympathy is more removed than *empathy*. When we have *sympathy*, we may not suffer along with those who are hurting, but we have compassion and are often willing to help.

EMULATE, IMITATE

Emulate means "to try to be as good or successful as."

Imitate means "to copy or fashion oneself after."

A sentence like *He tried to emulate her* is repeating itself: He *tried to try* to be as good as she was. We don't "try to emulate." When we *emulate*, we're already trying.

ENORMITY

This word is frequently misused: the "enormity" of football linemen these days, or the "enormity" of the task. *Enormity* has nothing to do with something's size. For that, we have such words as *immensity, vastness, hugeness, and enormousness*.

Enormity is an ethical, judgmental word meaning "great wickedness," "a monstrous crime." *The enormity of Jonestown* doesn't mean Jonestown was a huge place, but rather that it was the site of a hugely outrageous tragedy.

ENSURE

See **assure, ensure, insure**.

ENTHUSE

Many writers, editors, scholars, and critics regard *enthuse* and *enthused* as unserious and unacceptable.

EPITAPH, EPITHET

An *epitaph* is a tribute inscribed on a tombstone in honor of the person buried there.

An *epithet*, unlike an epitaph, is often an insult based on race, class, religion, politics, etc.: *The mob was shouting racial epithets*.

Otherwise, an epithet is a kind of nickname. It is a word or brief phrase that illustrates a defining trait of someone or something: *Alexander the Great, the wine-dark sea*.

EPITOME

The epitome of means "the essence of." It does not mean "the best," "the height of." *Sam is the epitome of humility* means that Sam is a perfect example of a humble person. It doesn't necessarily mean that he's one of the humblest men who ever lived.

ERSTWHILE

It's often confused with *worthwhile*. But *erstwhile* means "previous" or "one-time." My *erstwhile* assistant does not mean "my valuable assistant." It means "my former assistant" and nothing more.

etc., et al.

These abbreviations are a scholarly way of saying, "You get the point."

The term *etc.* means "and the rest," "and so on." It is usually placed at the end of a short list of things to save the writer (and reader) the trouble of going on needlessly.

When a list of people, rather than things, is involved, use *et al.* in place of *etc.*: *Joe Smith, Ray Jones, et al., led the team to victory.*

Both *etc.* and *et al.* require periods, even midsentence.

EVERY DAY, EVERYDAY

The two-word term *every day* is an adverbial phrase that answers the questions *when* or *how often*, as in *I learn something new every day.*

As one word, *everyday* is an adjective that means "ordinary" or "part of a daily routine": *These are my everyday clothes.*

EXACERBATE, EXAGGERATE

To *exacerbate* is to make a difficult situation worse or more intense: *The humidity exacerbated the intense heat.*

To *exaggerate* (note the double *g*) is to overstate, to stretch the truth: *He exaggerated when he said it was the hottest day on record.*

EXCEPT

See *accept*, *except*.

F

FACTIOUS, FRACTIOUS

Factious means "characterized by dissent and internal disputes." A factious group is liable to split off into *factions*.

Fractious means "irritable," "quarrelsome," "ill-tempered."

FAINT, FEINT

Faint: to go unconscious.

Feint: a distracting move meant to throw an opponent off guard (from *feign*).

FAIR, FARE

Fair: an exhibition (noun); just, impartial (adjectives).

Fare: payment for travel (noun); to have an experience (verb); to go through something (verb): *How did you fare on your test?*

FARTHER, FURTHER

The general rule: *farther* refers to real, physical distance: *Let's walk a little farther.*

Further deals with degree or extent: *Let's discuss this further.*

FAZE, PHASE

When something or someone *fazes* you, you are disturbed or troubled: *Her behavior doesn't faze me.*

A *phase* is a period or chapter: *He's going through a difficult phase right now.*

FEAT, FEET

Feat: an extraordinary act or accomplishment.

Feet: twelve-inch increments; appendages below the ankles.

FEWER, LESS

Here's a seemingly innocent sentence: *I now have two less reasons for going.* Make it *two fewer reasons*. If you can count the commodity (two reasons), *less* will be wrong. You have *less justification*, but *fewer reasons*.

Exception: When the amount is *one*, such a sentence should read, "I now have *one reason fewer*" or "*one less* reason, but not "*one fewer* reason." Admittedly, this is a head-scratcher, but that's English for you.

Use *less* for specific measurements of money, distance, time, or weight: *It costs less than a million dollars.* *We walked less than fifty feet.* *Less than thirty minutes had passed.* *It weighs less than five pounds.* The book *Modern American Usage* explains why: "We take a *million dollars* as a sum of money, not as a number of units; *fifty feet* as a measure of distance, not as one foot added to forty-nine other feet; *thirty minutes* as a stretch of time, exactly like half an hour...and the quantitative *less* is therefore correct in comparisons; *fewer* would sound absurd."

FIR, FUR

Fir: a type of tree.

Fur: animal hair.

FIRSTLY

See **secondly**, **thirdly**, **fourthly**.

FLAIR, FLARE

Flair: style; talent.

Flare: to erupt; to blaze.

FLAMMABLE, INFLAMMABLE

Let's see: *flammable* means "combustible." *Inflammable* means "combustible." Any questions?

FLAUNT, FLOUT

He was a rebel who flaunted the rules. That sentence is incorrect. Make it *flouted the rules*. To *flout* is to ignore, disregard, defy.

To *flaunt* is to make a big display: *She flaunted her diamond necklace.*

FLEA, FLEE

Flea: a type of insect.

Flee: to run away.

FLOUNDER, FOUNDER

One way to avoid confusing these two verbs is to think of *flounder*, the fish. Something that is *floundering* is thrashing around helplessly, like a fish out of water.

Founder means "to fail." If a business is *floundering*, it is in distress but may yet be saved. If a business *founders*, nothing can revive it.

FLOUR, FLOWER

Flour: an edible powder prepared by grinding grains.

Flower: the bloom of a plant.

FOREGO, FORGO

Many permissive editors allow *forego* in place of *forgo*. But *forego* means “to go before,” “precede”: *A good stretching session should forego rigorous exercise.*

To *forgo* is to abstain from, do without: *If you forgo a good stretching session, you might pull a muscle.*

FOREWORD, FORWARD

A *foreword* is an introduction, usually to a book. It’s sometimes confused with *forward*, meaning “ahead,” “forth.”

FORMER

See **latter**.

FORTH, FOURTH

Forth: onward.

Fourth: coming directly after whatever is third.

FORTUITOUS, FORTUNATE

Fortuitous is a chronically misunderstood word. To purists, it most emphatically does not mean “lucky” or “fortunate”; it simply means “by chance.” You are *fortunate* if you win the lottery *fortuitously*, but you can also get flattened by a truck *fortuitously*.

FOUL, FOWL

Foul: tainted; sickening.

Fowl: edible bird or birds.

FRACTIOUS

See **factious, fractious**.

FREE GIFT

A curious term for *gift*.

FULSOME

Many people take *fulsome* to mean “abundant” or “lavish.” But be wary of writing the likes of *He received a fulsome tribute* or *Please accept my fulsome apology*. The word actually means something darker: “excessive,” “fawning,” even “disgusting.”

FUN

Fun is a noun, not an adjective. Sentences like *It was a fun time* or the ghastly *It was so fun* have no place in serious writing.

FUR

See **fir**, **fur**.

FURTHER

See **farther**, **further**.

G

GAIT, GATE

Gait: stride; the way a person or animal walks or runs.

Gate: a barrier.

GAMUT

Gamut originally referred to the entire range of musical notes that the ear can recognize. It has come to mean the range or extent of anything: *His speech ran a gamut of emotions*. Do not confuse *run the gamut* with *run the gantlet* (see **gantlet**, **gauntlet**).

GANTLET, GAUNTLET

These two words, despite their similarity, come from different roots. The distinction should be preserved.

The expression *run the gantlet* means “to undergo criticism or harassment from several sources in a concentrated period of time.” It is often written *run the gauntlet*, which makes language nitpickers cry foul.

To *throw down the gauntlet* is to aggressively challenge someone. To *take up the gauntlet* is to accept such a challenge.

GEL, JELL

In popular usage, *jell* means “to come together”: *Our team is starting to jell*. *Gel* refers to a jellylike substance: *hair gel*.

GILT, GUILT

Gilt: gold coating.

Guilt: fault; blame; shame.

GLIB

A word with a split personality suitable for backhanded compliments and faint praise. *Glib* can mean “smooth,” “urbane.” But it can also mean “superficial,” “too slick.”

GRADUATE

He graduated high school last weekend. Make it *graduated from*. There are even some fuss-budgets who'd insist he *was graduated from* high school. But *graduated from* is as correct as *was graduated from*.

GRAFFITI

Note the double *f* and single *t*. *Graffiti* is the plural of *graffito*, Italian for “little scratching.” Therefore, *There was graffiti all over the wall* is incorrect. Make it *There were graffiti all over the wall*.

GRILL, GRILLE

Grill: a grated metal cooking utensil (noun); to cook over direct heat (verb).

Grille: a network of metal, wooden, or plastic bars that acts as a barrier or screen.

GRISLY, GRISTLY, GRIZZLY

Grisly means “horrific,” “gruesome.” However, *grisly* bears are not necessarily *grizzly bears*, North American brown bears known for their fierceness.

Don't confuse *grisly* with *gristly*, which means “tough,” “chewy.”

GUERRILLA

Note the spelling: double *r*, double *l*. Some think “guerilla” with one *r* is a valid alternative, but the word derives from *guerra*, which means “war” in Spanish.

H

HAIR, HARE

Hair: what grows on the head and body.

Hare: a rabbit.

HALL, HAUL

Hall: a passageway; a large room.

Haul: to pull or drag.

HALVE, HAVE

Halve: to divide in two.

Have: to possess; to hold.

HANGAR, HANGER

Many think that a shed or shelter for housing airplanes is a “hanger,” rather than a *hangar* (the correct spelling).

A *hanger* is something to hang a garment on, or someone who hangs things.

HANGED, HUNG

Speakers and writers who value precision know that the past tense of *hang*, when it means “to put to death using a rope,” is *hanged*, not *hung*. This applies to both the active and passive voice: *They hanged the prisoner* and *The prisoner was hanged*.

For inanimate objects, use *hung*. Under unusual conditions, people also *hung* or *are hung*, e.g., *He hung from the tree with one hand* or *He found himself hung upside down*.

HEAL, HEEL

Heal: to repair; to restore to health.

Heel: the back part of the foot; a scoundrel.

HEALTHFUL, HEALTHY

The difference between these two words is unquestionable, *healthful* meaning “something that promotes health” and *healthy* meaning “in good health.” But in everyday speech, *healthful* has been nudged aside by *healthy* in phrases like *healthy food* or *a healthy diet*.

HEAR, HERE

There is an *ear* in *hear*, and *here* is 80 percent of *where*.

HEROIN, HEROINE

Heroin: a drug derived from morphine.

Heroine: a woman admired for courage or ability.

HISTORIC

See **an historic**.

HOARD, HORDE

Hoard: to stockpile; to amass.

Horde: a large group; a crowd.

HOARSE, HORSE

Hoarse: raspy; sore-throated.

Horse: a type of animal.

HOLE, WHOLE

Hole: an opening.

Whole: entirety (noun); entire (adjective).

HOLY, WHOLLY

Holy: sacred.

Wholly: entirely.

HOMAGE

A critic called a film “a homage to motherhood.” The critic wisely did not write “an homage,” knowing full well that the *h* is sounded (see **an historic**). This word has spun out of control in the twenty-first century. Its traditional pronunciation is “HOMM-ij.” Then “AHM-ij” gained a foothold, and it went downhill from there. Now, just about all one hears is the pseudo-sophisticated “oh-MAHZH,” a pronunciation that was virtually nonexistent in English until the late twentieth century.

HONE IN

Make it *home in*. *Hone in* has achieved undeserved legitimacy for the worst of reasons: the similarity in sound and appearance of *n* and *m*. *Honing* is a technique used for sharpening cutting tools and the like.

To *home in*, like *zero in*, is to get something firmly in your sights, to get to the crux of a problem.

HOT WATER HEATER

A curious term for *water heater*.

HUNG

See **hanged, hung**.

I

IDLE, IDOL, IDYLL

Idle: not active; unemployed.

Idol: an effigy; a beloved celebrity.

Idyll: a happy interlude; prose or poetry describing rural serenity.

i.e.

See **e.g.**, **i.e.**

ILLUSION

See **allusion**, **illusion**.

IMITATE

See **emulate**, **imitate**.

IMMIGRATE

See **emigrate**, **immigrate**.

IMMINENT

See **eminent**, **imminent**.

IMPACT

As a verb, *impact* is constantly misused, and *affect* is almost always the better choice. Avoid such usages as *The proposition will impact property taxes* or *Greenhouse gas emissions negatively impact the environment*. Make it *affect* instead of *impact* in both sentences.

Impact means “to pack tightly together,” as in *an impacted tooth*.

IMPLY, INFER

Infer is not a synonym for *imply*. *Imply* is done by a speaker or writer—specifically, one who is being indirect: *She implied that I'm a fool* means that she didn't come right out and say it, but she got her point across.

Infer is done by a perceptive listener or reader who “catches” your meaning: *I infer that you think I'm a fool*.

Imply is akin to *suggest* and *insinuate*; *infer* is akin to *deduce* and *conclude*.

INCITE, INSIGHT

Incite: to provoke; stir up.

Insight: understanding; comprehension.

INCLUDE

From a story about a rescue at sea: “The rescued pair included an American woman and a Danish man.” This is a misuse of *include*, which means “to make someone or something part

of a group.” You can’t be *included* unless others are involved. The sentence requires a rewrite, something like *The two people rescued were an American woman and a Danish man.*

A major-league baseball team doesn’t *include* men; it *consists of* men, and only men. Compare: *Our office softball team includes women.* We realize immediately that it’s a coed league and there are also men on the squad.

INCREDIBLE, INCREDULOUS

Something *incredible* is beyond belief, so when we experience it, we are *incredulous*.

Incredulous refers to a state of astonishment or disbelief. It is not a deft synonym for *incredible*.

INFER

See **imply, infer**.

INFLAMMABLE

See **flammable, inflammable**.

INGENIOUS, INGENUOUS

What a difference one letter makes. *Ingenious* refers to worldly brilliance; *ingenuous* refers to otherworldly innocence.

IN ORDER TO

Sometimes *in order to* is necessary, but it’s often just a fussy way of saying *to*: *We should exercise in order to stay healthy.* Drop *in order* whenever possible.

IN REGARD(S) TO, WITH REGARD(S) TO

In regard to and *with regard to* are phrases that mean “regarding,” “concerning,” “on the subject of.”

As *regards*—note the *s* on the end—means the same thing. Perhaps this is why people mindlessly pluralize *regard* and say *in regards to* and its partner in crime, *with regards to*.

Both of the following examples are correct: *With regard to your friend, let’s hope she is well.* Compare that to *With regards to your friend. Let’s hope she is well.*

In the first sentence, *With regard to* means “concerning.” But in the second sentence, *regards* with an *s* is a plural noun meaning “best wishes.”

INSURE

See **assure, ensure, insure**.

IRONY

When something is *ironic*, it has a grimly humorous or paradoxical twist, as if the universe were playing a wicked practical joke. Thus, it is *ironic* if a speeding car crashes into a “drive carefully” sign, or if someone named Joe Friendly turns out to be a serial killer.

Do not use *irony* or *ironic* to describe a simple coincidence: *It's so ironic that our birthdays fall on the same day*. No irony there; it's merely *coincidental*.

IRREGARDLESS

This nonsense word results from confusing and combining *regardless* and *irrespective*. If people would just think about it, what's that silly *ir-* doing there?

In technical terms, *ir-* is an **initial negative particle**. So if *irregardless* means anything, it means “not regardless” when the person using it is trying to say the exact opposite.

IS IS

The thing is is that...The truth is is that...The problem is is that...The airwaves are teeming with commentators afflicted with the is is hiccup, one of life's mysteries, even to those who say it. The most alarming case in point: *The fact of the matter is is that*, a bloated locution intoned by certain pundits, often right before they express an opinion.

ISLE

See **aisle, isle**.

IT'S, ITS

It's: a contraction for *it is* or *it has*.

Its: a possessive pronoun meaning “belonging to it.”

J

JELL

See **gel, jell**.

JIBE, JIVE

The verb *jibe* means “to fit,” “to be in harmony with”: *His version did not jibe with hers*.

Many people say *jive* when they mean *jibe*, but *jive*, noun and verb, is African-American slang that originally referred to up-tempo, jazzy music. Then it became a term for hipster jargon.

It has come to mean dishonesty, silliness, or inanity: *talking jive* is lying or talking nonsense. *Stop jiving* means “Stop fooling around.”

JUST

Be careful where you put it. The meaning of *just* depends on its placement in a sentence, especially when it is accompanied by *not*, or by negative verbs such as *don’t* or *wouldn’t*.

Many people say *just not* when they mean *not just*, and this could lead to misunderstanding, embarrassment, even hurt feelings.

Not just means “not only,” whereas *just not* means “simply not” or “definitely not.”

He’s a trusted adviser, not just a friend means “He’s more than an adviser; he’s a friend, too.” But *He’s a trusted adviser, just not a friend* means something quite different: “I trust his advice, but he’s no friend of mine.”

JUST DESERTS

See **desert, dessert**.

K

KARAT

See **carat, caret, karat**.

KINDERGARTNER

Note how the spelling differs from *kindergarten*.

KNEW, NEW

Knew: past tense of *know*.

New: up to date; original; unused.

KUDOS

To this great man, kudos are due. That sentence wouldn’t raise many eyebrows, but *kudos* is not the plural of *kudo*. There’s no such thing as “a kudo.” *Kudos* is a Greek word (pronounced “KYOO-doss” or “KOO-doss”) meaning “praise” or “glory,” and you’d no more say “*kudos are due*” than you’d say “*glory are due*.” Admittedly, *kudos is due* looks odd. Better to rewrite the sentence.

L**LASTLY**

If you wouldn't say "firstly," why say "lastly"? Drop the *-ly*. (See also **secondly**, **thirdly**, **fourthly**.)

LATTER

He offered a trip to New York, Chicago, or Tarzana. She chose the latter. Oh no she didn't. *Latter* can't be used when there are three (or more) options. It applies only to sentences like *He offered a trip to New York or Tarzana*, which makes New York the *former*, Tarzana the *latter*. When there are more than two people or things mentioned, use *last*.

LAXADAISICAL

The word doesn't exist, but that doesn't stop people from saying it. The word they're looking for is *lackadaisical*: "without energy or enthusiasm."

LAY, LIE

These may well be the two most confounding three-letter words in all the language. The use of *lay* where *lie* is indicated has been a major problem for generations. Maybe because of the word's negative double meaning, people shy away from saying *lie*.

All of the following are incorrect: *I'm going to lay on the couch. Your wallet is laying on the dresser. He wants to lay down.* Make it *lie, lying, lie*, respectively.

Lie: You *lie* down today; you *lay* down yesterday; you have *lain* down before.

Lay: Please *lay* the book down now; you *laid* the book down yesterday; you have *laid* that book down before.

- Yesterday I *lied/laid/lain/lay* on the bed.
Most people would guess *laid on the bed*, but the correct answer is *lay*.
- I have often *lied/laid/lain/lay* on the bed.
Again, most people would guess *laid*, but *lain* is correct.
- I have often *lied/laid/lain/lay* my wallet on the dresser.
This time, *laid* is correct.

Lay vs. Lie Chart

	Present	Past
To recline	<i>lie; is/are lying</i>	<i>lay; has/have/had lain</i>
To put or place	<i>lay; is/are laying</i>	<i>laid; has/have/had laid</i>
To tell a falsehood	<i>lie; is/are lying</i>	<i>lied; has/have/had lied</i>

Examples in the present tense:

I like to lie down for a nap at 2 p.m.

I am lying down for a nap today.

Please lay the book down.

I am laying the book down.

I am tempted to lie about my age.

I am not lying about my age.

Examples in the past tense:

I lay down for a nap yesterday at 2 p.m.

I laid the book down yesterday.

He lied on the witness stand.

Examples with a helping verb (has, have):

I have lain down for a nap every day this week.

I have laid the book down for the last time.

He has lied each day on the witness stand.

LEAD, LED

Correct: *He led the parade*. Incorrect: *He lead the parade*. Budding writers are increasingly using *lead* instead of *led* as the past tense of the verb *to lead*.

There are three reasons for this confusion. First, the past tense of *read*, the other common -ead verb, is *read*. Second, the word *lead*, when it's a noun denoting a metal, is pronounced *led*, just like the past tense of the verb *to lead*. And third, they don't drill spelling in schools the way they used to.

LEAK, LEEK

Leak: an unintended discharge of liquid or gas.

Leek: a type of onion.

LESS

See **fewer, less**.

LESSEN, LESSON

Lessen: to decrease.

Lesson: something learned or studied.

LET HE WHO IS WITHOUT SIN...

One of the most notorious misquotations in the English language is “Let he who is without sin among you cast the first stone.” This misuse of the pronoun *he* has been giving English sticklers nightmares for decades.

How could it be “Let *he*”? It couldn’t. Here is the actual quotation from the Gospel of John: “He that is without sin among you, let him first cast a stone at her.”

LIABLE, LIBEL, LIKELY

Liable has a negative connotation: *He’s liable to have an accident if he doesn’t slow down.*

Libel is a malicious attack on someone’s character.

Likely refers to simple probability: *She is likely to be on time.*

LIE

See *lay, lie*.

LIGHTENING, LIGHTNING

That flash in an overcast sky is a bolt of *lightning*, which is sometimes misspelled *lightening*.

Lightening is the process of making something lighter in color or weight.

LIKE

Do it like she does. Sentences like that one have always been unacceptable to purists. Nowadays, however, such sentences go virtually unchallenged, even by many editors.

Strictly speaking, *like* can only be a preposition meaning “similar to” or “similarly to.” So *Do it like her* (i.e., *similarly to her*) would be correct. But because no one would say, “*Do it similarly to she does,*” there is no grammatical justification for *Do it like she does*.

In the mid-twentieth century, Theodore M. Bernstein said in *The Careful Writer*: “The usage of *like* as a conjunction...is not acceptable in better-grade writing.”

The *American Heritage Dictionary*’s panel of experts has noted that for more than a century, anyone who said *like she does* was considered illiterate. Yet today, the panel says, “*Like* is more acceptably used as a conjunction in informal style.”

The traditional view is that if a verb follows the noun or pronoun, as in *like she does*, it means *like* is the wrong choice. Instead, use *as, as if, as though, or the way*.

- *Do it the way she does* (not *like she does*).
- *Say it as if or as though you mean it* (not *like you mean it*).
- *Go when the light is green, as it is now* (not *like it is now*).

LITERALLY

I was so amazed, I literally hit the ceiling. If someone has *literally* hit the ceiling, he ought to move to a place with higher ceilings.

It was literally like being in Paris. Drop *literally*. Nothing is “literally like.” Anyone who says “literally like” doesn’t understand the word.

Literally is supposed to mean “100 percent fact”...period. But not today, when, as in the previous examples, *literally* is often used figuratively. That way madness lies.

In responsible usage, *literally* allows no room for poetry, analogy, hyperbole, frivolity, or any other flights of fancy. Any sentence containing *literally* should mean what it literally says. We are being asked to accept that sentence as fact and not interpret or infer. So if you say you were “literally stunned,” we have no choice but to conclude that you were physically incapacitated.

A newspaper item told of a couple whose dreams “literally collapsed” when a fixer-upper they bought came down in a heap as they started working on it. Now, we know what the writer meant, but the house is what literally collapsed, not the dreams. How could a dream, the very essence of all that is beyond materiality, *literally* collapse?

One simple solution: Say “virtually”: *I virtually hit the ceiling. Their dreams virtually collapsed.*

Virtually allows speakers and writers to enhance and embellish to their hearts’ content, options they relinquish when using *literally*.

LOAN, LONE

Loan: something given temporarily

Lone: only; solitary.

LOATH, LOATHE

Loath: reluctant.

Loathe: to dislike intensely.

I am *loath* to work for anyone I *loathe*.

LOOSE, LOSE

Loose: opposite of *tight*.

Lose: to misplace; to be defeated.

M

MAIL, MALE

Mail: correspondence.

Male: masculine.

MAIZE, MAZE

Maize: corn.

Maze: a labyrinth.

MANNER, MANOR

Manner: a method; a behavior.

Manor: a palatial residence.

MARQUEE, MARQUIS

Marquee: a projection over a theater entrance.

Marquis: an aristocrat; a nobleman.

MARRY, MERRY

Marry: to wed.

Merry: cheerful.

MARSHAL, MARTIAL

Marshal: a law officer (noun). To assemble (verb). Note the spelling: one *l*.

Martial: warlike.

MASTERFUL, MASTERLY

Another pair of words whose distinct meanings have been blurred by carelessness. The problem centers on *masterful*, in such phrases as *a masterful artist* or *a masterful performance*. Make it *masterly*, which means “highly accomplished,” “inspired,” “demonstrating mastery.”

Masterful has darker shadings. It’s about being the alpha dog: dominant, supreme—almost ruthlessly so. A *masterful performance* should refer to a boxer or a victorious football team rather than a cello concert.

MATERIAL, MATERIEL

Material: whatever something is made from.

Materiel: military equipment and supplies.

MAY

See **can**, **may**.

MEDAL, MEDDLE, METAL, METTLE

Medal: a decoration; a badge.

Meddle: to interfere.

Metal: an earth element.

Mettle: boldness; grit.

MEDIA

Among the language's most abused words is *media*, a plural noun; *medium* is the singular. A *medium* is a system of mass communication: *The medium of television is a prominent component of the mass media*.

Every day we hear and read statements like "The media is irresponsible," "The media has a hidden agenda." In those sentences, "media" should be followed by "are" and "have."

There are some who prefer and defend "the media is" and "the media has." To them, the various means of mass communication—newspapers, radio, TV, magazines, blogs, etc.—make up one "media."

The United States is where I live is correct, even though "States" is plural, so why not "the media is," even though *media* is plural? Nice try, but no sale.

Writers should insist on *the media are*. It's important that people think of *the media* as many voices, opinions, and perspectives rather than one monolithic entity.

MERETRIOUS

A veteran newsman said, "His career is meretricious." He probably meant *meritorious*. Instead, the sentence as it stands is an insult.

When you hear it, the first two syllables echo *merit*, but the similarity to *meritorious* ends there. *Meretricious* means "flashy," "cheap," "tawdry": *The candidate made a meretricious display of piety*.

METAL, METTLE

See **medal**, **meddle**, **metal**, **mettle**.

MIC

Mic is a bogus and clueless abbreviation of *microphone*. For too many decades to count, the word was *mike*. "Ike is good on a mike" went a line from a popular early-1950s song about presidential candidate Dwight D. Eisenhower.

A bicycle is a *bike*, not a "bic." So how is a microphone a "mic"?

MINER, MINOR

Miner: one who works in a mine.

Minor: someone under the legal age of adulthood (noun); of less importance (adjective).

MINUSCULE

Be sure to note that first *u*. A lot of writers think the word is “minuscule.” And it makes sense that a word for “tiny” would have a *mini* in it. Don’t think *mini*, think *minus*.

MISNOMER

A *misnomer* is a mistake, but not all mistakes are misnomers. The word is wrongly used in this sentence: *It's a misnomer that elephants are afraid of mice.* A *misnomer* is not the same as a *misconception*. The *nomen* in the middle is from the Latin *nomen*, meaning “name.” A *misnomer* is a mistake in labeling: for instance, calling aluminum foil “tinfoil” or calling a koala a “bear” (it’s a marsupial).

If “Lucky” Brown loses his fortune in the stock market and “Speedy” Green blows out his ankle, their respective nicknames become misnomers.

MORAL, MORALE

Moral: a lesson (noun); ethical (adjective).

Morale: spirit; level of enthusiasm.

MORE IMPORTANTLY, MOST IMPORTANTLY

Traditionalists do not accept *importantly* in sentences like *Most importantly, Churchill was a statesman.* Drop the *-ly* and save yourself a superfluous syllable. More important, you’ll be using good English.

MORNING, MOURNING

Morning: the start of the day, between night and afternoon.

Mourning: sorrow over a tragedy.

MUSCLE, MUSSEL

Muscle: fibrous tissue; strength.

Mussel: an edible marine bivalve.

N

NAVAL, NAVEL

Naval: pertaining to ships; nautical.

Navel: belly button.

NEITHER..OR

As a conjunction, *neither* often teams with *nor*: “Neither a borrower nor a lender be.” The rule many learned in fifth grade was, “Neither...nor, either...or, but never neither...or.”

Neither...or is another once-unthinkable faux pas gaining momentum among people who ought to know better. A political adviser’s resignation letter read, “This position is not a fit for me, neither personally or professionally.” (Make it “either.”)

A big-city newspaper editor wrote, “I neither commissioned or approved it.” Even editors need editors.

NEW

See **knew, new**.

NEW RECORD

See **all-time record**.

NONPLUSSED

Note the double *s*.

Nonplussed is widely misused as a synonym for *cool* or *unfazed*: *Despite his anxiety, he appeared nonplussed*. Clearly, the writer meant *nonchalant*. *nonplussed* means the opposite: “confused,” “thrown off.” *His strange behavior left her nonplussed*.

NOR

See **neither...or**.

NOT JUST

See **just**.

NOTORIETY

A critic wrote: “Burgess gained notoriety with his wildly popular children’s books.” Another oft-abused word, *notoriety* has somehow become a good thing. But can’t you hear the *notorious* in *notoriety*? There are all kinds of fame; *notoriety* is one of the bad kinds, just down the pike from *infamy*. This is a word best reserved for describing the world’s scoundrels.

NUMBER

See **amount, number**.

O**OFF OF**

“Hey! You! Get off of my cloud,” sang the Rolling Stones, unnecessarily. Make it *off my cloud*. The *of* in “off of” adds nothing, so why not drop it?

ORAL

See **aural, oral**.

ORDINANCE, ORDNANCE

Ordinance: a law.

Ordnance: military weapons and ammunition.

OVERDO, OVERDUE

Overdo: to go overboard with; behave excessively.

Overdue: behind time; payable.

OVERLY

She is overly concerned about her job. Note that if the opposite were true, no one would say “underly concerned.” Make it *too concerned* or *overconcerned*.

Many writers think *overly* is unnecessary and a bit precious. “Making *over* into *overly*,” says Bryson’s *Dictionary of Troublesome Words*, “is a little like turning *soon* into *soonly*. Adding *-ly* does nothing for *over* that it could not already do.”

P**PAIL, PALE**

Pail: a bucket.

Pale: lacking color.

PAIN, PANE

Pain: physical or emotional suffering.

Pane: a glazed piece or section of a door, window, etc.

PALATE, PALETTE, PALLET

Palate: the roof of the mouth; taste.

Palette: a range of colors; a board to hold and mix paint colors.

Pallet: a low, portable platform.

PARISH, PERISH

Parish: a district with its own church and clergy.

Perish: to stop existing; to die.

PARODY, SATIRE

A *parody* is a humorous imitation of a book, film, song, poem, etc., meant to poke fun at the original's style or intentions.

A *satire* uses biting humor, hyperbole, sarcasm, irony, etc., to lay bare the toxic absurdity of civilization.

PASSED, PAST

Passed: gone ahead of; approved.

Past: a former time; beyond.

PAST HISTORY

A curious term for *history*.

PASTIME, PAST TIME

A *pastime* is a leisurely pursuit or hobby.

The phrase *past time* refers to something that should have happened or been done by now.

It's *past time* that people realized that *pastime* is one word.

PEACE, PIECE

Peace: tranquility.

Piece: a portion.

PEAK, PEEK, PIQUE

Peak: a summit.

Peek: a glance (noun); to steal a glance (verb).

Pique: ill humor (noun); to arouse or annoy (verb).

PEAL, PEEL

Peal: to ring.

Peel: to strip.

PEDAL, PEDDLE

Pedal: a foot-activated lever (noun); to operate something with pedals, such as a bicycle or organ (verb).

Peddle: to sell or publicize.

PEER, PIER

Peer: a person who is an equal (noun); to look attentively (verb).

Pier: a structure extending out over water.

PENULTIMATE

“He’s the penultimate Washington insider,” said the glib pundit, blissfully unaware that *penultimate* means “second to last.”

PERCENT

One word.

PERPETRATE, PERPETUATE

Perpetrate: to commit a crime.

Perpetuate: to prolong or sustain.

PERSECUTE, PROSECUTE

To *persecute* is to go after in an intimidating, bullying manner.

To *prosecute* is to go after in a legal manner.

PERSUADE

See *convince, persuade*.

PHASE

See *faze, phase*.

PHENOMENON

This troublemaker baffles even articulate speakers. And they know it. If you listen closely, you’ll notice people trying to save face by fudging the last syllable.

Phenomenon is singular. “Management is a universal phenomenon,” declares a business website. It helps to remember the *-on* on the end, which almost spells *one*.

The plural form is *phenomena*. A commentator on national television had it exactly backward. He spoke of “the phenomena of climate change” and later used *phenomenon* as a plural. Others say “phenomenas” when they mean *phenomena*.

PIECE

See **peace, piece**.

PIQUE

See **peak, peek, pique**.

PISTIL, PISTOL

Pistil: the female organ of a flower.

Pistol: a gun.

PLAIN, PLANE

Plain: a treeless area of land (noun); not fancy; evident (adjectives).

Plane: a flat or level surface; short form of *airplane*.

PLUM, PLUMB

Plum: a type of fruit.

Plumb: to examine (verb); upright; vertical (adjectives); totally; precisely (adverbs).

p.m.

See **a.m., p.m.**

POINT IN TIME

At that point in time is an exercise in empty pomposity, made (in)famous by the Watergate hearings of the early 1970s and still going strong. Why not just *at that point* or *at that time*?

POLE, POLL

Pole: a long, cylindrical piece of wood or metal.

Poll: a collection of opinions; a survey.

POOR, PORE, POUR

Poor: deprived.

Pore: a small opening (noun). To study carefully (verb).

Pour: to send liquid flowing.

Be careful not to say “pour over” if you mean *pore over*.

PRAY, PREY

Pray: to speak to a deity.

Prey: a victim (noun); to hunt, to exploit (verbs).

PRECIPITATE, PRECIPITOUS

Media pundits have errantly decided that *precipitous* means “immediate” or “swift,” as when they discuss the advisability of “precipitous troop withdrawal.” The correct adjective would be *precipitate*.

Precipitous means “steep,” like a precipice.

PREDOMINATELY

Some mistakenly use it as an alternative to *predominantly*, as in “chiefly,” “primarily.” Funny thing about *predominate*: you might not see it for long stretches, and then, like some verbal swine flu, it crops up everywhere for a few weeks. Although *predominate* is technically a word, it’s not easy to pinpoint what it means.

PREMIER, PREMIERE

Premier is generally an adjective meaning “the best,” “of unsurpassed quality, skill, or importance.” As a noun, it refers to a head of government.

A *premiere* is an opening night or first performance.

PRESENTLY

Careful speakers and writers might consider avoiding this word. If you tell hungry guests, “We’re serving dinner presently,” they might think you mean *now*. But *presently* means “in the near future.” It’s a stuffy word anyway; what’s wrong with *soon*?

PRESUME

See **assume, presume**.

PRINCIPAL, PRINCIPLE

Principal: a major participant; the head of an institution (nouns); of first importance; chief (adjectives).

Principle: a fundamental belief; a fundamental fact.

PROFIT, PROPHET

Profit: gain.

Prophet: a predictor; a seer.

PRONE, SUPINE

The victim was found lying prone, her eyes gazing sightlessly at a full moon. Sorry, but this is a maneuver only the swivel-headed girl from *The Exorcist* could pull off, because when you're *prone*, you're lying on your stomach. Make that *supine*, which means "lying on one's back."

PROPHECY, PROPHESIZE, PROPHESY

A prophecy is a prediction.

When prophets make prophecies, they *prophesy*, not "prophesize."

It will be a crowning achievement, prophesized its chief engineer. Lose that *z* and make it *prophesied*. It is doubtful you could find any dictionary anywhere that lists "prophesize." Even the nonjudgmental *Webster's New World College Dictionary* shuns this common (mis)usage.

PROSECUTE

See **persecute, prosecute**.

PURPOSELY, PURPOSEFULLY

These words share much common ground, and they are sometimes interchangeable, but there are distinct differences. *Purposely* means "intentionally," but some acts are intentional, yet pointless: *Little Jimmy purposely threw Alice's lunch in the mud.*

Someone who does something *purposefully* is on a mission, with an important goal in mind: *The rescue team purposefully combed the woods for the missing child.*

Q-R

QUOTATION, QUOTE

To purists, *quote* is a verb only. When we *quote*, we repeat or reproduce someone's exact words.

The correct term for quoted material is a *quotation*. In casual usage, a quotation is often called a "quote," but *quote* as a noun is still not acceptable in formal writing.

RACK, WRACK

As a verb, *rack* means “to afflict,” “oppress,” “torment.”

To *wrack* is to cause the ruin of.

A lot of people mistakenly write things like “nerve-wracking” and “I wracked my brains.” Drop the *w* in both cases. Both expressions derive from that device in the torture hall of fame called the *rack*.

RAISE, RAZE

Raise: to lift up.

Raze: to take down.

RAP, WRAP

Rap: a sharp blow; a type of music (nouns); to strike sharply (verb).

Wrap: to enclose in a covering.

REAL, REEL

Real: actual, authentic.

Reel: a spool (noun); to stumble; falter (verbs).

REASON BEING IS

One hears this odd phrase frequently, in statements like *The economy is in trouble; the reason being is profligate spending*. Make it either *the reason being profligate spending* or *the reason is profligate spending*.

REASON IS BECAUSE

The reason is because we spend too much. Make it *The reason is that we spend too much*. Saying *the reason is makes because unnecessary*.

REEK, WREAK

Reek: to smell bad.

Wreak: to inflict.

REFER

See *allude*, *elude*, *refer*.

REGARDLESS

See **irregardless**.

REIGN, REIN

Reign: period in power (noun); to be in power (verb).

Rein: a strap to control horses (noun); to control or guide (verb).

RELISH IN

Jones is relishing in his new role as financial adviser. The sentence mistakes *relish* for *revel*. Either Jones *relishes* his role or he *revels in* his role.

RENOWN

Ansel Adams is renown for his timeless photographs. Make that *renowned*. This widespread gaffe results from thinking *renown* is akin to *known*, probably because they share those last four letters.

REST, WREST

Rest: to relax.

Wrest: to take forcibly.

REST, AS THEY SAY, IS HISTORY

The rest, as they say, is history is a cringe-inducing cliché. Not *The rest is history*, which has its place—it's that pseudo-sagacious *as they say* which really rankles. How to explain the enduring appeal of something so tired, weak, and breathtakingly unoriginal?

RESTAURATEUR

Note the spelling: no *n*.

RETCH, WRETCH

Retch: to heave.

Wretch: a lowly being; a scoundrel.

RETICENT

Reticent means “uncommunicative, reserved, silent.” But many people wrongly use it to mean “reluctant”: *I was reticent to spend so much on a football game.* No, you were *reticent* when you didn’t protest the ticket price.

REVEREND

In formal writing, there's no such thing as "a reverend." The word is an honorific used before a pastor's name: *the Reverend Josiah Blank*. Important: *the* is mandatory. Also note the phrase must be followed by the person's full name—to say "Reverend Blank" is wrong twice.

REVIEW, REVUE

Review: an examination or criticism (noun); to assess, to analyze (verbs).

Revue: a variety show.

RIFF, RIFT

Riff: a brief musical phrase; pithy or flippant wordplay.

Rift: a crack; a disagreement.

RIGHT, RITE, WRITE

Right: an entitlement (noun); correct, opposite of *left*, opposite of *wrong* (adjectives).

Rite: a ritual; a ceremony.

Write: to compose letters or words.

RING, WRING

Ring: the sound of a bell; jewelry worn around a finger.

Wring: to twist.

ROAD, RODE, ROWED

Road: a street; a path; a highway.

Rode: past tense of *ride*.

Rowed: past tense of *row*.

ROLE, ROLL

Role: a position; a part in a play or film.

Roll: a baked food; a flowing movement (nouns); to rotate; to flow with a current (verbs).

RYE, WRY

Rye: a grain.

Wry: mocking; ironic; droll.

S**SATIRE**

See **parody, satire**.

SAVER, SAVOR

Saver: someone or something that saves or conserves.

Savor: to appreciate.

SCENT, SENT

Scent: an aroma; a fragrance.

Sent: taken; moved.

SECONDLY, THIRDLY, FOURTHLY

As noted earlier, few people say “firstly,” and fewer yet say “fifthly,” “sixthly,” “seventeenthly,” etc. Many adverbs do not end in *-ly*. It makes more sense to use *second*, *third*, and *fourth* rather than *secondly*, *thirdly*, and *fourthly*.

SEMIANNUAL

See **biannual, biennial, semiannual**.

SENSUAL, SENSUOUS

Sensual: relating to sexual pleasure.

Sensuous: relating to or affecting the physical senses.

SERF, SURF

Serf: a slave.

Surf: waves.

SERIAL

See **cereal, serial**.

SET, SIT

Set: to place something somewhere.

Sit: to take a seat.

SEW, SO, SOW

Sew: to stitch.

So: as a result; in the manner indicated.

Sow: to scatter or plant seed.

SHEAR, SHEER

Shear: to cut; to clip.

Sheer: pure; steep; translucent.

[sic]

This is found only in a direct quotation (note the brackets). An editor inserts [sic] directly after a word or sentence to notify readers that something is off or incorrect, but is being reproduced exactly as it originally appeared.

SIGHT

See **cite**, **sight**, **site**.

SIMPLISTIC

It's not the same as *simple*. It means "oversimplified," as in *Your simplistic argument leaves out too many facts*.

At a memorial service, a well-meaning soul remembered a renowned artist as "a simplistic man." Some occasions are too solemn for foolish language lapses. Trying to express something commendable, the speaker instead said the dear departed had been a simpleton.

SINCE

See **because**, **since**.

SITE

See **cite**, **sight**, **site**.

SLASH

Despite its popularity, the slash (/), technically known as a **virgule**, is frowned on by purists. Other than to indicate dates (9/11/2001) or separate lines of poetry ("Celery, raw / Develops the jaw"), it has few defensible uses in formal writing.

Usually a hyphen, or in some cases the word *or*, will suffice. Instead of writing *the novelist-poet Eve Jones*, make it *the novelist-poet Eve Jones*. Rather than *available to any man/woman who is qualified*, make it *any man or woman*.

“The virgule is a mark that doesn’t appear much in first-rate writing,” says Bryan A. Garner in *A Dictionary of Modern American Usage*. “Use it as a last resort.”

SLEIGHT, SLIGHT

Sleight: dexterity; skill.

Slight: slender; of little substance.

SNUCK

Many think *snuck* is the past tense of *sneak*, but it’s not, at least not yet. The past tense of *sneak* is *sneaked*.

SO

See **sew, so, sow**.

SOAR, SORE

Soar: to fly high.

Sore: painful; in pain.

SOLE, SOUL

Sole: the bottom of a foot; a type of fish (nouns); single; solitary (adjectives).

Soul: essence; the spirit apart from the body.

SOME, SUM

Some: an unspecified number.

Sum: the total from adding numbers.

SON, SUN

Son: male offspring.

Sun: the star that is the central body of our solar system.

SOW

See **sew, so, sow**.

STAID, STAYED

Staid: solemn; serious.

Stayed: remained; waited.

STAIR, STARE

Stair: a step.

Stare: to gaze intently.

STAKE, STEAK

Stake: a wager; an investment; a pole.

Steak: a cut of meat.

STATIONARY, STATIONERY

Stationary: in one place; inactive.

Stationery: writing paper.

STEAL, STEEL

Steal: to rob.

Steel: an iron alloy (noun); to toughen (verb).

STEP, STEPPE

Step: a stair (noun); to move by lifting the foot (verb).

Steppe: vast grassland.

STOMPING GROUNDS

It started out as *stamping grounds*, which is still preferred by most dictionaries.

STRAIGHT, STRAIT

Words like *straitjacket* and *strait-laced* are frequently misspelled using *straight*, which is incorrect, but understandable. Wouldn't a "straightjacket" be just the thing to straighten you up and straighten you out? Doesn't "straight-laced" aptly describe a person of refinement (the *lace* part) who lives the "straight life"? This is why some authorities accept *straight-laced* as an alternative spelling. But a *strait* is a narrow channel, and it is that sense of "confinement with little room to maneuver" that generated these terms.

STRATEGY, STRATAGEM

Note the second *a* in *stratagem*.

Both words refer to plans of action. But *stratagem* denotes trickery. It is a scheme to deceive or outwit.

SUM

See **some**, **sum**.

SUN

See **son**, **sun**.

SUNDAE, SUNDAY

Sundae: ice cream with syrup.

Sunday: a day of the week.

SUPINE

See **prone**, **supine**.

SUPPOSE TO

Never “suppose to.” Don’t drop the *d* in usages like *You’re supposed to be here*.

SURF

See **serf**, **surf**.

SYMPATHY

See **empathy**, **sympathy**.

T

TACK, TACT

Tack and *tact* are commonly confused when discussing strategy.

A *tack* is a course of action.

Tact is discretion.

We decided to try a new tack is correct, but “a new tact” is what a lot of people say, mistakenly thinking “tact” is short for *tactic*.

TAIL, TALE

Tail: the hindmost animal appendage.

Tale: a story.

TAKE

See **bring, take**.

TAUGHT, TAUT

Taught: trained; educated.

Taut: stiff; tightly stretched.

TEAM, TEEM

Team: a group with the same goal (noun); to form a squad (verb).

Teem: to swarm.

TEMBLOR

Although it produces tremors and makes the ground tremble, an earthquake is a *temblor*, not a “tremblor.”

TENANT, TENET

A *tenant* is someone who pays rent to use or occupy a property. But “tenant” is often mistakenly used in place of *tenet*, a fundamental belief or principle held true by a group or organization.

THAN, THEN

Than is used for comparison.

Then means “next,” “after that.”

THAT

See **who, which, that**.

THEIR, THERE, THEY'RE

Their: belonging to them.

There: in that place.

They're: contraction of *they are*.

They're in their car over there.

THOSE KIND OF

Instead of “those kind of things,” say either *those kinds of things* or *things of that kind*. Better yet: *things like that*.

TILL, 'TIL

Always use *till*. You won’t find a reference book anywhere that recommends *'til*. Writer John B. Bremner declares brusquely, “Either *till* or *until*, but not *'til*.”

It’s natural to assume that *'til* is a contraction of *until*. However, *till* predates *until* by several centuries.

TO, TOO, TWO

To: in the direction of; toward.

Too: also; excessively.

Two: the number after *one*.

TORT, TORTE

Tort: a breach of contract.

Torte: a rich cake made with little or no flour.

TORTUOUS, TORTUROUS

Tortuous: winding; twisting: *a tortuous trail*.

Torturous: painful; causing suffering: *held under torturous conditions*.

TOTALLY

Not to be used arbitrarily. How is *totally convinced* different from *convinced*?

TOWARD, TOWARDS

The Associated Press Stylebook insists on *toward*, but both are acceptable and mean the same thing.

TRANSPIRE

The celebrity issued a statement through his attorney that he was “sorry and saddened over what transpired.” This usage of *transpire*, though common, is incorrect. The word doesn’t mean “occur” or “happen.” Something that transpires is revealed or becomes known over time. The Oxford online dictionary gives this example: “It transpired that millions of dollars of debt had been hidden in a complex web of transactions.”

TREMBLOR

See **temblor**.

TROOP, TROUPE

Troop: a body of soldiers.

Troupe: a group of traveling performers.

Mike is a real trouper. Many would spell it “trooper.” But a *trooper* is either a cop or a soldier in the cavalry, whereas a *trouper*, according to the *American Heritage Dictionary*, is “a reliable, uncomplaining, often hard-working person.”

TRULY

Note the spelling: no *e*.

This word is often just window dressing. How is *I truly believe* different from *I believe*?

TURBID, TURGID

Turbid means “muddy,” or “unclear,” literally and figuratively. Both a river and a poem may properly be called turbid.

Turgid means “swollen,” literally and figuratively. One may suffer physically from a turgid limb, or mentally from a turgid (i.e., pompous and bombastic) speech.

U

UNINTERESTED

See **disinterested, uninterested**.

UNIQUE

The Big Easy is *one of America’s most unique cities*. Drop *most*. What’s wrong with saying *one of America’s unique cities*?

Unique is, on its own, a potent word, and it must never be accompanied by an intensifier, since modifying it saps its considerable power. When you use *unique*, put it out there alone—otherwise, say *unusual*.

Unique belongs to a group of words called **absolutes** or **incomparables**. Examples include *dead, equal, essential, eternal, opposite, supreme*. Such words resist being modified. Modifiers like *more, most, absolutely, rather, and very* either strip them of their strength or result in foolishness.

“Would you say ‘very one-of-a-kind?’” asks Roy Blount Jr. in his book *Alphabet Juice*. Adding *very* or *absolutely* to *unique*, Blount says, “is like putting a propeller on a rabbit to make him hop better.”

UTILIZE

All the way back in the 1940s, George Orwell blew the whistle on this pretentious word in his classic essay “Politics and the English Language.” Orwell advised writers to get over themselves and go with *use*. But *use* is so humble, so mundane, whereas *utilize* really sounds like something. Bureaucrats in particular love to use *utilize*.

V

VAIN, VANE, VEIN

Vain: futile; narcissistic.

Vane: a blade moved by wind: *weather vane*.

Vein: a blood vessel; a mood.

VENAL, VENIAL

Venal: corrupt,” “able and willing to be bribed.”

Venial: “forgivable.”

Any writer who inadvertently drops the *i* in a sentence like *Her lapse was venial* may want to think about getting a good lawyer.

VERSES, VERSUS

Verses: lines of poetry.

Versus: as compared to another choice; against.

VERY

Serious writers are wary of *very*. Very often, this very word is very unnecessary.

VIABLE

Viable means “able or fit to live”: *viable cells*, *a viable fetus*.

In popular usage, *viable* has become synonymous with *possible*, *workable*, *feasible*. Many purists consider this unacceptable. Roy Copperud, in *American Usage and Style*, says “the word has had the edge hopelessly ground off it.”

VIAL, VILE

Vial: a small container.

Vile: evil, depraved.

VICE, VISE

Vice: a bad habit; an immoral practice.

Vise: a device used to hold an object firmly.

VIRTUALLY

See **literally**.

W**WAIST, WASTE**

Waist: the part of the human body between the ribs and hips.

Waste: garbage (noun); to squander (verb); to spend uselessly (verb).

WAIT, WEIGHT

Wait: to stay; to be available.

Weight: heaviness; significance.

WAIVER, WAVER

Waiver: relinquishment of a right.

Waver: to feel indecisive; to swing unsteadily.

WARN, WORN

Warn: to notify about trouble.

Worn: carried on the body; deteriorated.

WARRANTEE, WARRANTY

Warrantee: a person who is given a written guarantee or a warrant.

Warranty: a written guarantee.

WARY, WEARY

Wary: mistrustful; guarded.

Weary: exhausted; drained.

WAY, WEIGH

Way: a method; a direction; a manner.

Weigh: to measure mass; to mull over.

WAYS TO GO

A *ways to go*, meaning “a considerable distance,” is best avoided in formal writing.

WEAK, WEEK

Weak: lacking strength.

Week: a period of seven days.

WEATHER, WHETHER

Weather: climatic conditions (noun); to withstand (verb).

Whether: if; in case.

WHETHER OR NOT

Often, the *or not* can be dropped, as in *I don't know whether or not you've heard this*.

WHICH

See **who**, **which**, **that**.

WHILE, WILE

While: during.

Wile: a ploy to fool, trap, or entice.

WHO, WHICH, THAT

Use *who* only when referring to humans. Avoid such usages as *a company who* or *a country who* or *a dog who*. For those, *that* or *which* is correct.

Contrary to superstition, *that* is perfectly acceptable when applied to people. *The Man That Got Away* and *The Girl That I Marry*, two hit ballads from the mid-twentieth century, were written at a time when the popular culture expected literacy from its songwriters. And don't forget the famous quotation from the Gospel of John which begins, “He that is without sin among you...”

Which as a pronoun should never refer to humans. (It's an adjective in sentences like *Which man do you mean?*)

WHOLE

See **hole**, **whole**.

WHOLLY

See **holy**, **wholly**.

WHO'S, WHOSE

Who's is a contraction of *who is* or *who has*.

Whose is the possessive case of *who*.

Who's the man whose wife called?

WITH REGARD(S) TO

See **in regard(s) to**, **with regard(s) to**.

WON'T, WONT

Won't: contraction of *will not*.

Wont: habit; custom (nouns); accustomed (adjective).

WORN

See **warn**, **worn**.

WRACK

See **rack**, **wrack**.

WRAP

See **rap**, **wrap**.

WREAK

See **reek**, **wreak**.

WREAK (WRECK) HAVOC

Because *wreak havoc* means “to cause destruction,” some mistakenly think the first word of the phrase is *wreck*.

WREST

See **rest**, **wrest**.

WRETCH

See **retch, wretch**.

WRING

See **ring, wring**.

WRITE

See **right, rite, write**.

WRY

See **rye, wry**.

Y**YOKE, YOLK**

Yoke: a harness for oxen.

Yolk: the yellow part of an egg.

YOU'RE, YOUR

You're: contraction of *you are*.

Your: belonging to you.

CHAPTER 6

QUIZZES

GRAMMAR PRETEST

Correct the grammar error in each sentence. Answers are in Chapter Seven.

Example: Shoshana felt badly about failing the Geometry test.

Correction: Shoshana felt bad about failing the geometry test.

1. How quick he runs.
2. Neither one of them are ready yet.
3. The desk and the chair sits in the corner.
4. Each of us were scheduled to take the test.
5. The coach, not the players, have been ill.
6. There is only four days until Christmas.
7. She is one of the women who works hard.
8. That was Yusuf and me whom you saw.
9. This phone call is for Bill and I.
10. Terrell is the smartest of the two.
11. It was I whom called.
12. It is us clerks who work hard.
13. He took the plate off of the table.
14. I am doing fine. How about yourself?
15. They mailed the copies to him and I.

16. Neither of the candidates have spoken.
17. How will you be effected financially if downsizing means you will lose your job?
18. Joan walks slow so her children can keep up with her.
19. Jake is the oldest of the two brothers.
20. May did good on the test she took yesterday.
21. He and she were real close friends.
22. Whomever drove in the carpool lane without any passengers will be fined.
23. Please allow Jenna or myself to assist you.
24. It's a company who doesn't judge others by their nationalities and accents.
25. They fought over their father's estate because they felt angrily about the way he had treated them.
26. You look well in that running outfit.
27. Don't feel badly about forgetting my birthday.
28. We saw two puppies at the pound and took home the cutest one.
29. Speak clearer please.
30. Where is that book at?
31. Pollen effects my sinuses and makes me sneeze.
32. I want to lay down for a nap, but the phone keeps ringing.
33. That SUV, that landed on its hood after the accident, was traveling at eighty miles per hour.
34. Yesterday, Barry lay my jacket on the hood of the car.
35. We need to discuss this farther.
36. My daughter became a honorary member of the city council for the day.
37. The group is on their best behavior.
38. Your the only one for me.
39. That redwood tree has become taller then the oak tree next door.
40. The time for action has long since past.
41. Its a long way from here to Tierra del Fuego.
42. Mother, can I go to the movies with Ashton this afternoon?
43. I could of danced all night.
44. Srdjian immigrated from his native Bosnia about five years ago.
45. Did you see the beautiful broach Genevieve was wearing today?
46. The teacher tried to illicit a discussion about the novel.
47. La Donna talks fondly about the four years that she has went to the university.
48. The answer is plane and simple.
